GENERAL STATEMENT.

Date of opening	1828
Estimated value of real estate, including buildings	$600,000 00
Total acreage	235
Acres of farm land under cultivation	175
Daily average number under treatment	778
Cash on hand November 1, 1893	$6,542 79
Receipts during the year—	
From State Treasury for maintenance	$100,000 00
Reappropriation for sanitary improvements	500 00
From pay patients	8,005 22
From all other sources	896 71
Total receipts during the year	$115,944 72
Disbursements during the year—	
Supplies	$61,280 42
Salaries and wages	38,583 57
Minor expenses	1,879 43
Construction	981 14
Coal en route	3,008 10
Appropriations	6,650 00
Total disbursements during the year	$112,383 06
Balance remaining on hand November 1, 1894	$3,561 66
Weekly *per capita* cost on current expenditures, inclusive of clothing, etc	2 37
Maximum rate of wages paid attendants—	
Men	23 00
Women	18 00
Minimum rate of wages paid attendants—	
Men	15 00
Women	10 00
Percentage of daily population engaged in some kind of useful occupation	45
Estimated value of farm and garden products during year	$23,327 11
Estimated value of articles made by patients during year	3,000 00

REPORT OF THE BOARD OF REGENTS.

COLUMBIA, S. C., October 31, 1894.

To His Excellency, B. R. TILLMAN, *Governor of South Carolina.*

SIR: The Board of Regents of the South Carolina Lunatic Asylum have the honor to submit to your Excellency the Annual Reports, with the accompanying vouchers.

The total number of patients under treatment during the year was 1,107, daily average 778 and 798 remain at the close of the fiscal year. The cost per capita for the year has been $123.37, or about 34 cents per day.

The report of the Superintendent seems to show no increase of insanity in South Carolina during the last six years, and therefore implies that the duty of the State to her insane wards is at present rather in the line of better accommodations for an average of about 800 patients.

The hygienic condition of the Asylum demands further attention. Although much has been done in the way of improvement, much more remains to be accomplished. As was pointed out in our last Report, the old building especially requires renovation. The disease tuberculosis, of which pulmonary consumption is the most common form, has become especially prevalent among our colored patients. While this disease causes about 14 per cent. of all the deaths in the world, in charitable and penal institutions it is the cause of 20 to 60 per cent. of the whole mortality. In our Asylum the average mortality from tuberculosis for ten years has been 22 per cent. The disease is now regarded by many competent authorities as communicable. If this conception be true, then to check its ravages in our midst is the duty, not only of the physician and sanitarian, but of all thoughtful persons. If the dread disease be preventable, then our Commonwealths should empower the officers of our public institutions to spare no pains to remove its causes. The Board of Regents and the medical officers of the Asylum are fully alert to the responsibility of their trust, and are making every effort within their means to investigate and exterminate the disease.

Through convict labor assigned us by the last General Assembly we have had made 260,000 brick for the erection of a building for colored male patients. We now ask for a detail of convicts for this purpose next year and for an appropriation to begin the building that has been needed for a quarter of a century.

Among the more important improvements which the Board have thought necessary have been the closing of Pickens street between the old and the new buildings, thus throwing the grounds into one enclo-

sure; the extension of a side-track three-quarters of a mile long and connecting with the Southern Railway, and the proposed erection of a store-room for the better care and distribution of supplies. All these changes have been made after careful consideration and with the sole purpose of economy of administration.

The Training School for Nurses, now in its third year, continues to prove of benefit, both to the institution and to the community.

In former reports attention has been called to the need of having a revision made of the laws governing the Asylum. The Board has at length had prepared in the form of a single bill such a revision of the old statutes, together with such new provisons as seem expedient. To this bill we wish especially to call your Excellency's attention.

The Regents wish to refer the question of further insurance of the buildings to the joint committee of the Legislature upon the Asylum for advice and final decision.

The attention of the Board of Regents has recently been called to the fact that no monument marks the grave of Dr. J. W. Parker, who for 45 years was connected with the Asylum and who during most of that time was its faithful and efficient Superintendent. In view of Dr. Parker's life-long devotion to the interests of the institution the Board would recommend to the General Assembly that a suitable memorial be erected to mark his last resting place.

The following appropriations are asked for, after careful consideration of the needs of the Asylum for the coming year:

For maintenance	$100,000 00
For building for colored men	20,000 00
For insurance	6,000 00
For mileage and per diem of Regents	1,200 00
For patients' library	150 00

The department of the farm, under the efficient management of the steward, Mr. J. W. Bunch, as you will see, has added much to our comfort, as well as being a most profitable investment.

Our second assistant physician, Dr. M. B. Heyman, has resigned his position, after nearly two years' service. His place has been filled by the appointment of Dr. W. A. Kirby.

We trust that the Legislature will continue to maintain this noble charity in becoming manner, and make such appropriations for it as are needed.

We have the honor to be your obedient servants,

B. W. TAYLOR,

President of the Board of Regents
of the South Carolina Lunatic Asylum.

Parker family did have monument marking the grave now in Elmwood cemetery by Nolan Tripp — 1985

SUPERINTENDENT'S REPORT.

To the Board of Regents.

GENTLEMEN: The seventy-first annual report, with accompanying statistical tables and financial statement is herewith submitted.

At the beginning of the year there remained under care and treatment in this Asylum 759 patients, of whom 358 were men and 401 women; 430 being white and 329 colored. During the year there were admitted 309 patients, 160 of whom were white and 149 colored. The whole number under treatment was 1,107. Our daily census averaged 778; the highest number being 813 and the lowest 753. The total discharges, excluding deaths, were 176. The mortality was 133. As compared with last year 6 less were admitted and 16 less were discharged. The daily average was 13 higher, and 2 less were under treatment. Two less were discharged recovered and 25 less died. Of the patients remaining October 31, 1894, 460 were white and 338 colored, making a total of 798 or 39—30 white and 9 colored—more than were present at the beginning of the year.

GENERAL HISTORY.

ADMISSIONS.

At times during the year our accommodations for patients have been overcrowded. It has not yet been necessary, from lack of room, to refuse admission to any citizen of this State requiring care and treatment here. Several applications for the admission of patients from other States have, of necessity, been declined.

Of the 309 patients admitted 304 were committed by Judges of Probate, three were not insane and four were suspected or accused of crime before the development of their alleged insanity. Two were voluntary cases of alcoholic habits.

Careful analysis and comparison of the admissions of the last six years do not indicate that insanity has increased in South Carolina out of proportion with the population, as is shown by the following tables:

TABLE OF ADMISSIONS.

1889	302
1890	322
1891	311
1892	318
1893	315
1894	309

Further inquiry into these cases discloses the fact that the proportion of first attacks to the population—which is the only true index of increase of insanity—also fails to indicate any increase during the period referred to.

TABLE OF FIRST ATTACKS.

1889	217
1890	229
1891	212
1892	219
1893	210
1894	198

Again, classifying by color and sex, we find:

TABLE OF COLOR AND SEX.

	White.			*Colored*			Grand
	Men.	Women.	Total.	Men.	Women.	Total.	Total
1889	90	50	140	86	76	162	302
1890	72	85	157	85	80	165	322
1891	94	61	155	80	76	156	311
1892	91	76	167	88	63	151	318
1893	83	77	160	85	70	155	315
1894	92	68	160	80	69	149	309

During the period of six years the daily average has considerably increased, because of the accumulation of chronic cases:

TABLE OF DAILY AVERAGES.

1889	714
1890	754
1891	754
1892	754
1893	765
1894	778

Upon the basis of the figures here presented it seems incumbent upon the State to make ample provision at present for a daily average of about 800 patients. During the past year the daily census has several times exceeded that number, and the year closed with only two less than 800 in the house.

CAUSATION.

A study of the causes of insanity as assigned by friends upon the commitment papers of patients is never altogether satisfactory or

reliable. Few cases of insanity can be narrowed down to a single cause. Usually mental alienation is the final product of a complex number of factors, of all of which even those most familiar with the personal history of the patient may not be aware. Still, careful inquiry should always be made, since by this method of investigation alone are we enabled to arrive at the nearest approximation to the truth. Inquiry into the causation of cases admitted here during the last five years shows that among the chief alleged causes of mental alienation in South Carolina rank in order of frequency, heredity, epilepsy, ill health, intemperance, domestic trouble and religious excitement.

DISCHARGES.

Of the 176 discharges, seventy-five, or 24 per cent. on admsisions, were discharged as recovered ; twenty-seven, much improved ; thirty-two, improved ; and nine unimproved. Nine were removed against advice by friends, who assumed in writing all responsibility for their care. The elopements were five or seven less than last year. At the close of the year fourteen were out "on trial", the three months of probation having not yet expired.

DEATHS.

The number of deaths was 133, or 25 less than last year. As in recent years tuberculosis leads the list as the chief cause of mortality among our patients, especially those of the colored race. Statistics show that one-seventh of all the deaths of the world are due to this fatal disease. In institutions, such as large asylums, prisons, etc., tuberculosis is proportionately much more fatal, causing from 20 to 60 per cent. of the whole mortality. This disease is now regarded by many competent authorities as communicable. Investigation of the subject here gives reason to confirm this belief. From 1880 to 1893 the deaths from tuberculosis were distributed as indicated by the following table:

DEATHS FROM TUBERCULOSIS FROM 1880 TO 1893.

White.			*Colored.*			Grand
Male.	Female.	Total.	Male.	Female.	Total.	Total.
38	52	90	43	165	208	298

The colored women who died from the disease outnumbered the other three classes by 32. This, too, when the smallest part of our population consists of colored women. This class of patients occupies

the old Asylum built in 1822. Judged by modern standards the whole building is very defective. Over two-thirds of these fatal cases had resided here from one to twenty years.

During the past year 43 cases have died of some form of tuberculosis. This is a decrease of 7 less than last year. Of the 3 white men who died one had been here less than a year, and the average time of residence of the other two was one year and nine months. Of the five white women, one had been here under a year and the remaining four had an average residence of six years and four months. Of these four white women three lived in the old building. Six of the 19 negro men had been here less than a year and the remainder had an average asylum residence of five years and three months. Of the 16 negro women, four had an asylum residence of less than a year and the other 12 averaged four years and eight months.

Exhaustion from the various forms of mental disease comes second as a cause of death here. Other causes have been: general paralysis, 13; status epilepticus, 9, and typhoid fever, 2.]

MANAGEMENT OF THE ASYLUM.

Our institution has four departments, two for each sex of the white and colored race. At present the department for white men is in fair condition except its plumbing. The white women, who constitute the largest part of our population, are overcrowded and the buildings they occupy have serious sanitary defects. The negro women, who, for the most part occupy the old building, are surrounded by such hygienic evils as insufficient ventilation, defective plumbing, want of sunlight and overcrowding. The buildings for colored men are of wood, and besides being insecure and very dangerous in case of fire, have no redeeming feature from a sanitary point of view. The correction of these defects is imperative. This will necessitate the erection of additional wards for white women adjoining the building now occupied by them and the construction of a fireproof building for negro men. The negro women can then all be accommodated in the old building which is undergoing thorough renovation. When these changes have been made all wooden buildings can be discarded, as was strenuously urged by Dr. Parker twenty-five years ago, and as each of his successors has petitioned for.

Such is the situation which confronts us. During the past year the hygienic condition of the Asylum has been improved so far as our means permitted. New verandas have been added to eleven wards, the natural methods of ventilation improved, many wards have been renovated by new plastering and painting, and other means of improving

the health and the comfort of the patients have been sought out and developed.

For several months all tuberculous partients have slept in single rooms. So far as possible these rooms have been carefully prepared for the management of cases of an infectious nature. The wards that have appeared to be most infected have been thoroughly renovated. Since the question of the communicability of tuberculosis is a vital one, not for this Asylum only, but for other institutions, as well as for the public at large, every effort is now being made to investigate, check and stamp out the disease.

Thanks to the experience and assistance of Drs. Taylor and Talley of the Board of Regents, we have been able to give more attention to such cases as required special gynæcological treatment. If permanent mental improvement has not followed in each case their bodily comfort has been restored.

LABORATORY.

The further equipment of the laboratory for pathological and bacteriological investigation has been carried on so far as our means permitted, and plans are making for further improvement.

TRAINING SCHOOL.

The training school for nurses continues to provide a steadily improving class of nurses for the Asylum as well as the community. The principle of giving instruction in general nursing to asylum nurses is unquestionably correct. Eventually such schools are destined to be recognized as one of the first essentials of a hospital for the insane, just as trained nurses are now demanded by public opinion for general hospitals. The managers of the Columbia Hospital have extended to the female pupil nurses the privilege of spending a portion of the two years in the wards of that hospital.

EMPLOYMENT AND AMUSEMENTS.

The principle that for the insane work promotes cure or retards dementia has not been lost sight of during the year. The farm, workshop, wards, dining-rooms and kitchens have afforded means of employing many male patients, while the sewing rooms, housekeeping, laundry, fancy work, etc., have occupied the women. While the beneficial effects of this work upon the patients' health cannot be calculated, a fair estimate of the money value of all the labor done by

patients in all departments of the Asylum would not fall below $15,000.

The amusements, dances, entertainments, etc., have also received their full share of attention.

BRICKMAKING.

In accordance with the authority granted by the last General Assembly about thirty convicts from the Penitentiary have been employed at brickmaking from July 20 to October 1. The result has not been so good as was expected, because of unfavorable weather, but 260,000 brick were made and are now ready for use in beginning the construction of the new building for colored men. As there should no longer be any delay in carrying forward this plan, I would suggest that an appropriation for this specific purpose be asked of the General Assembly, and that authority be obtained again to employ convict labor next year at brickmaking for a longer period.

PROTECTION AGAINST FIRE.

In July the Mayor and Board of Aldermen of the city of Columbia voted to the Board of Regents the use of a hand fire-engine, which adds materially to our protection against the spread of fire. All arrangements are now being made for further improving our fire protection.

INSURANCE.

Our insurance costs about $3,000 per annum, or $6,000 when taken for a period of three years. The present policies expire next Spring. It will, therefore, be necessary for the Board to consider this matter in asking for your appropriations next year.

FARM.

The Report of Mr. J. W. Bunch of the operations of the farm is very satisfactory. The estimated market value of the products of the farm for the year is $23,327.11, and the cost of labor, fertilizers, etc., was $15,091.13, thus giving a profit of $8,235.98, or $47.12 per acre of the 175 acres under cultivation.

The irrigation of about 20 acres with the sewage from the institution continues in successful operation. The improvement of the outbuildings, dairy, etc., has been carried on in proportion to our means. In view of the suggestions of Mr. Bunch, it seems to me that the addition of more land to our present tract is necessary in order to prevent, by allowing a portion of it to lie fallow each year, exhaustion of the soil.

DIX FUND.

In the early part of the year the Asylum recovered certain bonds of the city of Charleston of the value of $3,300, and bearing interest at 4%. About 1875 this fund was collected by subscription from benevolent persons in this State by Miss Dorothea L. Dix, the life-long friend of the insane of all countries. Some years ago these bonds, which had been purchased by the subscribed fund, were lost. Last Winter they were finally recovered and restored to the institution through the kind efforts of Hon. J. F. Ficken, Mayor of Charleston; Charles Inglesby, Esq., Corporation Counsel, and Mr. A. H. Hayden, a former Regent. This fund constitutes the only permanent investment affording an income to be expended, as designated by Miss Dix, for promoting the pleasure and comfort of the patients. It is hoped that it will form the nucleus of a gradually increasing fund.

SUGGESTIONS FOR THE GENERAL ASSEMBLY.

I would suggest to your Board the propriety of again calling the attention of the General Assembly to the need of revising the laws relating to the Asylum, especially to the form of committing patients. Some of the laws still retained in the Revised Statutes have been dead letters for years. Again, there is a different mode of commitment in the case of paying and beneficiary patients, whereas all patients should be committed by the same process of law. There does not seem any valid reason why the whole process of commitment should not rest upon the affidavit of two physicians and the right of commitment be vested in the Judges of Probate, or the Judges of the higher Courts in particular cases. This arrangement would greatly simplify the commitment of patients, while it would protect the rights of individuals and the State much better than does the present complicated process.

FINANCIAL RESULTS.

The Treasurer's Report gives in detail the receipts and expenditures for the year. The subjoined calculation shows that our annual *per capita* was $123.37, as compared with $132.80 last year.

Our daily average has been thirteen more patients than last year. The prices of food stuffs, except bacon, meal and rice, have been cheaper than last year. Again, the produce from the farm, as already mentioned, is estimated at the value of $23,327.11. These facts have enabled us to bring the *per capita* below the average of recent years.

The permanent improvements which your Board has had under contemplation during the past year are now approaching completion,

and to meet the expenses of the same the following sums were appropriated :

Railroad	$2,000.00
Ventilation of Old Asylum	500.00
Fire apparatus	500.00
Pickens street wall	150.00
Plumbing	1,000.00
Cows	500.00
Water supply	2,000.00
	$6,650.00

The following analysis gives the summary of debits and credits:

Balance to credit from last year	$ 6,542.79
Additional appropriation of maintenance	100,000.00
Reappropriation for sanitary improvements	500.00
Receipts from pay patients	8,005.22
Receipts from other sources	896.71
Gives as the total income	$115,944.72

The disbursements have been for

Supplies		$ 61,280.42	
Salaries and wages		38,583.57	
Coal *en route*		3,008.10	
Minor expenses		1,879.83	
Construction		981.14	
Appropriations		6,650.00	
Total		$112,383.06	$112,383.06
Deduct for improvements	$9,341.49		
Stock	160.00		
Rebate, etc	249.50		
Appropriations	6,650.00	16,400.99	
Maintenance		$95,982.07	
Leaves a balance to credit, after paying for coal, etc. . . .			$3,561.66

If we now consider the cost *per capita* we find that amount expended

on maintenance proper was	$95,982.07
Divided by 778, daily average number of patients, gives the annual *per capita*	123.37
Divided by 52 gives the weekly *per capita*	2.37
Divided by 7 gives the daily *per capita*	.338

The following table gives the annual *per capita* for the last ten years:

1884	$146.34
1886	140.27
1887	137.39
1888	140.59
1889	137.47
1890	131.05
1891	133.42
1892	132.11
1893	132.80
1894	123.37

ESTIMATES FOR NEXT YEAR.

Carefully prepared estimates show that to meet the needs of the coming year specific appropriations should be asked for as follows:

For maintenance	$100,000 00
For building for colored men	20,000 00
For insurance	6,000 00
For mileage and per diem of Regents	1,200 00
For patients' library	150 00

RELIGIOUS SERVICES.

Chapel services have been regularly held by ministers of the Baptist, Episcopal, Methodist and Presbyterian denominations, and during the year the Rev. Mr. Carroll, Rev. A. R. Mitchell, Rev. Dr. Elwell and Rev. Mr. Robertson have officiated. The Rev. Father Fullerton has visited the patients of his faith.

ACKNOWLEDGMENTS.

To the following ladies and gentlemen we return thanks for generously sending contributions of reading matter for the patients:

Governor Tillman and Mr. James Norton, a weekly supply of newspapers; American Sunday School Union, Philadelphia, a parcel of papers each week; Miss Brigham, Boston, a barrell of magazines, books, etc.; Mrs. James Woodrow, religious papers; Mrs. Norton, newspapers and magazines; Judge A. C. Haskell, newspapers; Messrs. R. L. Bryan & Co., illustrated papers; Mr. J. S. Pierson, New York, Christmas cards.

The editors of the following papers have placed the Asylum under obligations for gratuitous copies of their papers, regularly sent:

CHANGES ON THE STAFF.

The only changes on the staff have been in the Second Assistant Physicianship, Dr. M. B. Heyman having resigned September 22, and the vacancy thus caused having been filled by the appointment, October 1, of Dr. W. A. Kirby, of St. Georges.

To your Board individually and collectively I wish to render my thanks for your continued confidence and very cordial support in my endeavor to administer the affairs of this Asylum.

Respectfully submitted,

J. W. BABCOCK,

Physician and Superintendent.

Farm Report.

Dr. J. W. Babcock, *Superintendent.*

Sir: Below you will find a statement of the expenses and revenues derived from the Asylum Farm, for the fiscal year ending October 31st, 1894.

The seasons were very unfavorable for oats and the early planting of both vegetable and field crops, but was all that could be desired for field crops planted after March.

During the year we have built a barn 32x80 feet, two and one-half stories high, for the mules and storage of corn, hay, etc., at a cost of about $700, a crib for corn at a cost of $100, a house for servants at a cost of $50, a house for attendant and a pasture for hogs at a cost of $300, furnishing shade and fresh running water for the animals which will, we hope, increase our yield of pork fed from the swill and waste from the institution and Farm. Twenty acres have been tile-drained during the year.

While the yields of most of the field crops have been heavier than heretofore, on account of prices ruling about 40 per cent. less in this market than last year, with the shortage of the earlier crops and charging ourselves with the crops left on hand at last report at the old prices, without deducting for rot, waste or shrinkage, reduces our net earnings this year to $8,235.98.

The Farm being composed of a light porous, sandy soil is easily leached by rains, and when not well supplied with humus is unable to resist extremes of either wet or dry weather, which soon renders it incapable of responding to compound cropping where two, three or more crops are wanted in quick succession during the season with but little to depend upon except commercial fertilizers as manures. The question arises, shall we in the face of these facts continue our present policy or resort to the more rational one of adopting a regular rotation with say one-fourth or one-fifth of the land allowed to lie fallow and recuperate each year. If the latter plan is adopted the Asylum must either buy more land or for a time at least reduce the present yields from the Farm. If the present system is continued I fear it will be merely a matter of time when the Farm ceases to pay a profit over expenses.

Mr. Cobb, and in fact all the assistants in this department, have given faithful and efficient service. Respectfully,

J. W. BUNCH,
Secretary and Treasurer.

APPENDIX I.

Directions Concerning the Admission of Patients.

The Asylum is open to three classes of patients: (*a*) Beneficiary, (*b*) Pay and (*c*) Voluntary.

(*a.*) The steps to be taken for the admission of beneficiary patients are: (1) an affidavit before a Trial Justice or other proper officer; (2) the sworn certificate of two licensed physicians that the patient is dangerously or violently insane; (3) the formal commitment by Circuit Judge, Judge of Probate or County Commissioners, to which is added the certificate of the County Commissioners that said patient is entitled to beneficiary care.

(*b.*) The affidavit before a Trial Justice, or other proper officer, and the certificate of two licensed physicians are required. The right of admission and detention in these cases is vested in the Board of Regents of the Asylum.

(*c.*) Persons addicted to alcohol, opium or chloral may be admitted as voluntary patients by binding themselves to obey the rules of the institution and paying in advance such rates as may be determined by the Superintendent.

Affidavit to Secure the Examination of an Insane Person.

Interrogations to be Answered by Competent Witnesses.

Patient's Name and Surname.	Age.	Single, Married or Widowed.	Occupation.	Education.	Religious Denomination.
1. Where was he or she born?					
2. What is the natural disposition? Cheerful or melancholy, reserved or frank?					
3. What have the usual habits been? Quiet, industrious; or idle, vicious or quarrelsome?					
4. Intemperate in the use of spirits, tobacco, opium or other narcotics?					
5. What is supposed to have been the immediate cause of the disease?					
6. What circumstances may have previously tended to produce insanity, or predisposed to the attack?					
7. Has any peculiarity of feeling or thinking been observed in the behavior preceding the derangement? Any elevation or depression of spirits?					
8. Has there been anything remarkable in the constitution? What bodily ailment has the patient been most subject to?					
9. State what relatives of the patient have been known to be insane, eccentric, vicious or intemperate?					
10. Is the disease joined with epilepsy, palsy or any other violent and distinct malady?					
11. How long has the patient been insane on the present occasion?					

12. Did any bodily disorder precede this attack? If so, state its nature and duration.	
13. If the patient be a female, be particular in stating any irregularity or obstruction.	
14. Did the present attack occur in child-birth, or during pregnancy, nursing or any nervous excitement?	
15. Has any obvious changes in its form occurred? Does it appear at stated or uncertain periods, or to be increasing, declining or stationary?	
16. Is the patient restless, sleepless, wandering, violent, destructive or noisy by night or by day?	
17. Mention particularly the delusions of the patient?	
18. Has the patient ever threatened or attempted to commit suicide? If so, by what means?	
19. Does the patient manifest any disposition to injure other persons? and how?	
20. Has the patient been insane before the present attack? When and how often did such attack occur? Were they treated at home or at an asylum? And were they in any case completely cured?	
21. Has the patient received any treatment for the present attack? If so, state the remedies employed?	
22. Address of friends.	

The rates of pay patients are established as follows: Pay patients, at the general table, $20.85 per month, that is at the rate of $250 per annum; at a private table, at the rate of $350 per annum; with special nurse and private table, at the rate of $700 per annum. Payment must be secured by a bond of two sureties, to be approved by County Commissioners, and subject to acceptance or rejection by the Board of Regents.

When, in the opinion of the Superintendent, a patient shall be sufficiently restored to be discharged, he shall be brought before the Examining Committee, who shall examine into the case; and if they con-

cur with the Superintendent, measures shall be taken to inform friends of the patient, and he shall be discharged accordingly.

When patients are only convalescent, or for other reasons it may be deemed advisable to recommend a visit to their homes or friends, the Examining Committee may, at their discretion, allow such patients to go out on trial for ninety days, during which time the patients shall be kept on the books of the Asylum and returned without recommitment in case of relapse. If improvement continues, such patients must be finally discharged at the end of ninety days.

Whenever a beneficiary patient of the Asylum shall be declared harmless and incurable, notice shall be immediately sent by mail to the County Commissioners of the County to which he belongs; and in case such patient is not sent for within one month after such notice shall have been sent, it shall be the duty of the Superintendent to send him and cause him to be delivered to one of the members of the said Board, and the expenses shall be charged to the said Commissioners.

Patients from other States may be admitted on such evidence of their lunacy as the Regents regard sufficient, upon payment of such rates as the Superintendent may see fit to charge. A bond, with the security of a person residing within this State, will be required to secure the payments as they become due.

APPENDIX II.

South Carolina Lunatic Asylum Training School for Nurses.

The Board of Regents of the South Carolina Lunatic Asylum, wishing to improve the standard of service in the care of the insane, and recognizing the great and wide-spread demand for skilled nurses, have established a Training School for their instruction and education, and offer to men and women desirous of becoming professional nurses a two years' course of training in general nursing, including the care of cases of nervous and mental diseases.

The most desirable age for applicants is from twenty-three to thirty-five years. They must be of pleasant and kindly disposition, and possess such mental and educational qualifications as give promise of fitness for the work. *They must be in sound health, and must send with their application a certificate from a physician certifying to the fact; also one from a clergyman as to their good character and good health. They must pass a preliminary examination in educational qualifications and capacity for work.* Applicants must be sufficiently interested in the subject of nursing, and free from all encumbrances, so that they can, in all reasonable probability, complete the prescribed course of two years. Upon the recommendation of the Superintendent of the Asylum, with the approval of the Governor and the Board of Regents, they will be received for two months on probation, at the expiration of which time they will, if accepted, sign an agreement to complete the prescribed course of two years.

The Superintendent of the Asylum, under the authority of the Board of Regents, has charge of the Training School. Probationers and pupil-nurses are subject to the rules of the Asylum. Their fitness for the work, and the propriety of retaining or dismissing them at the end of the two months of trial, is determined by the authorities of the School, who can in like manner suspend them at any time in case of misconduct or inefficiency.

The instruction is given to men and women in separate classes, and includes the general care of the sick, the managing of helpless patients in bed, in moving, changing bed and body linen, making of beds, etc.; giving baths, keeping patients warm or cool, preventing and dressing bed sores; bandaging, applying of fomentations, poultices and minor dressings; the preparing and serving of food, the feeding of helpless

patients and those who refuse food; the administering of enemas and the use of the catheter; attendance upon patients requiring diversion and companionship; the observation of mental symptoms, delusions, hallucinations, delirium, stupor, etc.; and the care of excited, violent and suicidal patients.

They are also given instruction in the best practical methods of supplying fresh air, warming and ventilating sick rooms in a proper manner, and are taught to take proper care of rooms and wards, in keeping all utensils perfectly clean and disinfected, etc.; to observe the sick accurately in regard to the state of the secretions, pulse, breathing, skin, temperature, sleep, appetite, effect of diet, of stimulents, and medicine; the giving of massage, and the managing of convalescents.

The instruction is given by the Superintendent, assistant physicians and graduate nurses. The course of study consists of lectures, recitations and clinical teaching. Text-books to aid in these studies are provided by the Asylum. Nurses must pass satisfactory examination on the subjects of the first year before beginning the second year of the course.

The pupils are employed as assistant nurses in the wards of the Asylum. For their clothing and personal expenses: women will be paid ten dollars ($10) per month during the first year, and twelve dollars ($12) per month during the second year; men will be paid fifteen dollars ($15) per month during the first year, and seventeen dollars ($17) per month during the second year. Their education during this time is considered as compensation for their services. Nurses also receive board, lodging and washing, and medical care during temporary illness. The pay of nurses who have completed the two years' course of training, and received the certificate of graduation, will be for men $21 per month, and for women $16 per month. Graduate head nurses on ordinary wards will receive $1 a month, and on infirmary wards $2 a month additional. As a further inducement to continue in the service of the Asylum, an increase of $1 a month will be allowed to all the above for each year after the third and up to the sixth year of service.

The managers of the Columbia Hospital have extended to the female pupil-nurses the privilege of spending a portion of the two years in the wards of that hospital.

After acceptance they are required to wear at all times, while on duty in the wards, the Asylum uniform. When the full term of two years is completed, the nurses thus trained receive (after final examination) certificates stating their period of training, their proficiency and good character.

The right is reserved to terminate the connection of any nurse or pupil with the school for any reason which may be deemed sufficient.

N. B.—This paper to be filled in (in the Applicant's own handwriting) and sent, with physician's certificate and recommendations, to the Superintendent of the South Carolina Lunatic Asylum, Columbia, S. C.

QUESTIONS TO BE ANSWERED BY THE APPLICANT.

1. Name in full of Applicant. .....
2. Are you single, married, or widowed? .....
3. Your present or last occupation or employment? .....
4. Age last birthday, and date and place of birth? .....
5. Height?..... Weight?.....
6. In what school or schools educated, and in what place? .....
7. Are you strong and healthy, and have you always been so? .....
8. Are your sight and hearing perfect? .....
9. Have you any physical defects? .....
10. Have you any tendency to pulmonary complaint? .....
11. If married or widowed, have you children? How many? Their ages? How provided for? .....
12. Are you otherwise free from domestic responsibility, so that you are not liable to be called away? .....
13. Where (if any) was your last situation, and how long were you in it? .....
14. Have you ever been in any Training School, or employed in any Hospital or Asylum? If so, where, and how long in each place? .....

15. The names in full and addresses of two responsible persons, not of your own kindred, to be referred to. State how long each has known you. If previously employed, one of these must be the last employer.	Name..... Address..... has known me.....years. Name..... Address..... has known me.....years.
16. Have you read, and do you clearly understand, the foregoing conditions and regulations?	....

I declare the above statements to be correct, and in my own handwriting.
