STATE DOCUMENTS

HOSPITAL SERVICES

FISCAL YEAR 2002

DEFINING ELEMENTS OF THIS REPORT . . . .

Unknown ages were omitted whenever average age was computed.

AVG LOS = Average Length of Stay

AVG LOS of Regular Discharges: The average time between admission or transfer into a particular facility and when the patient receives a regular discharge from that facility. The average is computed in days for all facilities.

AVG LOS of Residents: The average time between admission or transfer into a particular facility and June 30. The average is computed in days.

Number Served: Counts each episode of care during the reporting period.

UNDUPLICATED Number Served: Counts patients served during the reporting period only once and is based on patient's unique identification. Patient information is from the patient's last episode of care during the reporting period.

Hospital Admissions from the Community are inpatient admissions who have never been SCDMH inpatients or whose community length of stay between a SCDMH inpatient community discharge and SCDMH inpatient readmission is greater than zero days.

Hospital Discharges to the Community are inpatient discharges who are not readmitted or transferred to another SCDMH inpatient hospital program on the same day as their discharge.

Diagnoses are DSM IV codes. Diagnostic groupings are based on primary psychiatric diagnoses.

Unless otherwise specified, BDTP (Behavioral Disorders Treatment Program) and nursing care facilities are not included.
