

LIFE GPA

(as of July 18, 2005)

(Deletions are indicated with strikethroughs and additions are in italics and underlined)

What is a LIFE GPA?

“LIFE grade point average” shall be defined as the cumulative grade point average calculation that includes credit hours and grades earned at all eligible institutions based on a 4.0 scale. The LIFE grade point average must not include attempted credit hours earned for continuing education courses, non-degree credit courses for an associate degree or higher and remedial/developmental courses.

Calculating LIFE GPA

For students who would like to have their GPA calculated according to Act 162 for the 2005-06 academic year, the student must contact the financial aid office and make an official written request for this year only. The student will have the responsibility of submitting his or her transcripts from all institutions to determine eligibility for the LIFE Scholarship. LIFE Scholarship eligibility for 2006-07 will be automatically calculated according to H. 3906 for all students. Students will not be required to self-identify or submit a request. All institutions must establish a system for calculating a new LIFE GPA that will be in operation by this time.

Definition of Eligible Institution:

An “eligible institution” shall be defined as a regionally accredited public or independent institution located in-state or out-of-state, or an institution from which transfer credit is accepted. The LIFE GPA must include all grades earned at any eligible institution, including courses that do not transfer based on the institution’s policy and college courses taken while in high school. The LIFE GPA must not include continuing education courses, non-degree credit courses for an associate’s degree or higher and remedial/developmental courses. The recognized regional accrediting bodies are the Southern Association of Colleges and Schools, Middle States Association of Colleges and Schools, New England Association of Schools and Colleges, North Central Association of Colleges and Schools, Northwest Commission on Colleges and Universities, and Western Association of Schools and Colleges.

Steps for calculating a LIFE GPA:

- 1) Convert all grades earned at an eligible institution to a 4.0 scale based on each institution’s grading policy where the grades were earned = grade points
- 2) Multiply the Grade Points by Attempted Credit Hours = Quality Points (QP)
- 3) Divide the total quality points by the total number of attempted credit hours = LIFE GPA
- 4) LIFE GPA Formula:
$$\frac{(\text{Grade Points X Attempted Credited Hours} = \text{QP})}{\text{Total Attempted Credit Hours}} = \text{LIFE GPA}$$

Again, the LIFE GPA must include all grades earned at any eligible institution, including courses that do not transfer based on the institution’s policy and college courses taken while in high

school. The “LIFE GPA” must not include continuing education courses, non-degree credit courses for an associate degree or higher and remedial/developmental courses.

For this year, there is a budget Proviso 5A.25 in effect that allows for a one year implementation of the modification in the LIFE GPA calculation. The Proviso allows students to use either the cumulative GPA or the new LIFE GPA, whichever is more advantageous for them for 2005-06.

Calculating Credit Hours

Students must earn an average of thirty credit hours for graduation purposes by the end of each academic year based on initial college enrollment:

- (a) earn a minimum of 30 (or the equivalent) credit hours if a rising sophomore; or
- (b) earn a minimum of 60 (or the equivalent) credit hours if a rising junior; or
- (c) earn a minimum of 90 (or the equivalent) credit hours if a rising senior; or
- (d) earn a minimum of 120 (or its equivalent) credit hours if entering the fifth year of an approved five-year baccalaureate degree program.

Students may use credit hours earned when they were dually-enrolled in high school and college, AP courses, and exempted courses towards the LIFE Scholarship.

Transfer Students

For determining initial eligibility of a transfer student at the new institution, a student must have a minimum cumulative 3.0 GPA on a 4.0 scale at all prior institutions and an average of 30 credit hours per academic year. ~~For continued eligibility at the new institution, transfer students may only use credit hours that transfer to the new institution for the graduation purposes toward the requirement of an average of 30 credit hours per academic year for the LIFE Scholarship.~~

For continued eligibility at the new institution, transfer students must have at least a 3.0 LIFE GPA and earned an average of 30 credit hours (or its equivalent) per year at all institutions attended or consistent with the institutional policies for graduation purposes.
