## BRANNON IS BACK

JEAN BRANNON

Corporate Aviation Services, located at the Downtown Greenville Airport, takes great pleasure in announcing the appointment of Jean Brannon as General Manager effective December 7.

Jean brings to Corporate Aviation in excess of 40 years of experience in all phases of general aviation and his knowledge will certainly be an asset to Corporate Aviation Services, Inc. as well as general aviation.

Jean's background goes back to the days when Greenville Airport was a dirt strip. He owned and operated his own FBO facility and taught many South Carolina pilots what flying was all about. He still maintains a pilot certificate and has logged in excess of 33,000 flight hours. Jean is a pioneer in South Carolina aviation.

We urge all South Carolinian aviators to come in and visit the facility and chat with Jean for some of his stories are fascinating as well as enjoyable. In addition he would be happy to show you the facility and the services that he has to offer which include the sale of 80 octane fuel as well as double S & H green stamps on all fuel purchases through the month of January.

Corporate Aviation Services, Inc. also operates Brainard Airport in Hartford, Conn. They operate 16 aircraft out of Hartford on bank courier service and cargo flights. They have four non-stop cargo flights to Charlotte each week and Corporate Aviation is also the Aero Star dealer for the South East.

They have an FAA license repair station for major aircraft repair including jet aircraft and plan to open an avionics early this year. Charter service is also available at Corporate Aviation Services.
