Statement of Estimated State Revenue Impact

Date: February 1, 2013

Bill Number: H.B. 3107

Author: Cobb-Hunter

Committee Requesting Impact: House Ways & Means Committee

Bill Summary
A bill to amend the Code of Laws of South Carolina, 1976, by adding Section 12-6-3632 so as to allow a refundable state individual income tax credit equal to ten percent of the federal earned income tax credit and annually to increase the amount of the credit in increments of two and one-half percent until the credit equals twenty percent.

REVENUE IMPACT
This bill would reduce General Fund individual income tax revenue by an estimated $139,411,100 in FY2013-14.

Explanation
This bill would add Section 12-6-3632 to allow a refundable state individual income tax credit equal to ten percent of the federal earned income tax credit allowed when a taxpayer files federal income taxes beginning in tax year 2013. The tax credit percentage would increase by two and one-half percentage points each tax year until reaching twenty percent in tax year 2017 and each tax year thereafter. Based upon the latest federal tax return data from the U.S. Department of the Treasury, Internal Revenue Service, South Carolina taxpayers filed for 506,281 earned income tax credits claiming $1,167,216,000 in earned income tax credits in tax year 2010. Projecting this amount to tax year 2013 by the average growth in the earned income tax credits since tax year 2000, yields an estimated $1,394,111,000 of earned income tax credits in tax year 2013. Applying a ten percent tax credit percentage to an estimated $1,394,111,000 of federal earned income tax credits in tax year 2013 yields a reduction in General Fund individual income tax revenue of $139,411,100 in FY2013-14. Because the tax credit is refundable even if the taxpayer doesn't have any tax liability, the full amount would be returned to taxpayers filing for earned income tax credits in tax year 2013. This act takes effect upon approval by the Governor and applies for taxable years beginning after 2012.
