F. Efficiency Measures:

The completion of the Leroy Davis Science Complex allows for chemistry, biology and physics courses to be offered in more modern and better equipped facilities for classrooms and laboratories. It reduces overcrowding in classes and allows an expansion of science offerings. (See the 2010-2011 Accountability Report Section 2). No funds have been reprogrammed as a result of these efficiencies.

Migration of the ERP system to Banner 8 and numerous upgrades in other technology initiatives enhanced the effectiveness and efficiency campus-wide, from new students being able to complete the on-line application process through payment of fees, direct data uploads for SAT and ACT, automating the registration/scheduling process, and improved on-line course capabilities through Blackboard. (Not noted in the Accountability report). No funds have been reprogrammed as a result of these efficiencies.

E. Project Description:
Note: In addition to a basic description, include whether or not this is a capital or non-capital project. If non-capital, explain how this non-recurring appropriation will be spent on non-recurring activities.

Capital - The plan for expanding the library addresses the dramatic changes in information technologies that have occurred during the past decade, especially library information technologies and digitization of text. The present library is too small and outdated to serve the expanded service area. In addition, the University is continuing the expansion of the Bibliography Instruction Program, expansion of e-resources to support the University’s goals for curriculum, research and remote programs; and continues to serve as a community information hub for local school districts, daycare centers 1890 Extension and local citizens. The Library is an important, cultural and educational resource for the service area. A report done by an outside consultant revealed over \$1 million of deferred maintenance needs on the library, mainly health and safety issues. There are several damaged areas that are causing health and safety issues. The renovation of the existing space will identify the problems and correct the deficiencies. Continued deferment of this work would adversely impact the University’s and the State’s well being should rare and invaluable archive material be lost or the health and safety of patrons of the facility be threatened.
