

## South Carolina's Gross Domestic Product

The total economic output or gross domestic product (GDP), of South Carolina was \$184 billion in 2013, the latest year for which data is available. The state GDP is the measurement of a state's output; it is the sum of value added from all industries in the state and accounts for the market value of all goods and services produced by labor and property in the state. GDP by state is the state counterpart to the nation's gross domestic product. The Palmetto State's GDP ranks 31st nationwide, just larger than Kentucky's (\$183 billion) and Oklahoma's (\$182 billion) and slightly less than Alabama's (\$194 billion). The total economic output of South Carolina is similar to the GDPs of nations like Romania (\$190 billion), Kuwait (\$185 billion), New Zealand (\$181 billion) and Ukraine (\$178 billion). Between 2012 and 2013, South Carolina's real GDP grew 3.4 percent, outpacing the southeast states average growth of 3.2 percent.
