

# FACTS ABOUT FOSTER KIDS

## Fairfield County

### 2006

(2005 Data)

A Publication of the South Carolina Governor's Office – Division of Foster Care Review

## OVERVIEW

*Facts About Foster Kids* is intended to provide annual data about children in foster care for every county in South Carolina. It covers: **Demographics** -- how many children there are in foster care, their characteristics and whether their prevalence is increasing or decreasing; **Areas of Concern** -- legal and program shortcomings identified at monthly citizen reviews; and **Progress Measures** -- length of time in care, number of placements, achieving permanency, and recidivism rates. Information is collected from local volunteer citizen review boards that review the cases of all children who have been in foster care at least four months; each case is then reviewed every six months thereafter until the child leaves care. The 2006 edition includes complete information about children who were reviewed at least once in 2005. It also includes demographics on those children who entered foster care late in the year and were not reviewed until 2006, but does not yet incorporate them into progress measures or areas of concern.

## DEMOGRAPHICS

For Fairfield County, the number of foster care children reviewed decreased in 2005. The number of children entering care and the number leaving care also decreased in 2005.

Children in Foster Care, 2002 – 2005, Fairfield County					
	2005	2004	2003	2002	Average
Number of Children Reviewed	17	23	21	21	21
Change from Prior Year	-6	+2	0		
Number Entering	4	5	2	3	4
Number Leaving	7	11	4	4	7

<b>Percent of Reviews with Areas of Concern</b>	<b>47%</b>	<b>15%</b>	<b>22%</b>	<b>25%</b>

## PROGRESS MEASURES

Four main indicators are used to measure progress towards better outcomes for children in foster care. For each, comparison data for the previous four years are provided.

### LENGTH OF TIME IN CARE:

The longer a child is away from their home or a nurturing family environment, the more damaging it can be to the normal development of the child. For this reason, a major goal of the Review Board is to ensure that children achieve permanency as quickly as possible. In 2005, the average length of time in Fairfield County increased to 4.4 years.

### NUMBER OF PLACEMENTS:

Research shows the initial placement in foster care is extremely traumatic for a child. Additional changes in placement once in the foster care system can be detrimental to children's development, affecting their ability to learn, establish relationships and develop as stable, secure individuals. In 2005, Fairfield County's average number of placements increased slightly to 2.9.

### PERCENT ACHIEVING PERMANENCY:

Permanency for a child means placement with a "forever family." A child can achieve legal permanency upon leaving the foster care system either by returning home to their natural parent or by being adopted. In 2005 of the seven children leaving care, two were adopted and one returned home to their natural parent.

## RECIDIVISM RATES:

Children who re-enter care are some of the most vulnerable children in foster care because they have been in the custody of DSS more than once. In 2005, one of the children entering foster care in Fairfield County had previously been in custody. For children re-entering foster care, the previous location matters. Last year the child re-entering care was in the custody of their adoptive or natural parents or another relative.
