Who We Are

Santee Cooper, South Carolina's state-owned electric and water utility, is the nation's third largest publicly owned electric utility of its type based on generation and fourth largest based on megawatt-hour sales to ultimate customers.

The source of power for more than 2 million South Carolinians, Santee Cooper provides direct service to about 162,000 retail customers in Berkeley, Georgetown, and Horry counties. Santee Cooper is the primary source of power distributed by the state's 20 electric cooperatives to more than 685,000 customers located in all of the state's 46 counties. Santee Cooper also supplies power to 30 large industrial facilities, the cities of Bamberg and Georgetown, and the Charleston Air Force Base.

Also, through the Santee Cooper Regional Water System, wholesale water is sold to the Lake Moultrie Water Agency. The agency then sells the water to four Lowcountry water systems supplying water to some 136,000 water users.

Santee Cooper was the first utility in the state to offer Green Power, electricity generated by renewable resources like solar and decomposing garbage in selected landfills.

The utility is governed by an 11-member board of directors that is appointed by the governor, deemed fully qualified by the Senate Public Utilities Review Committee and confirmed by the state Senate. The board consists of directors representing each of six congressional districts, each of three counties where Santee Cooper serves retail customers directly, two directors with previous electric cooperative experience and the chairman appointed at large.

**The mission
of Santee Cooper
is to be the state's
leading resource
for improving
the quality of life
for the people
of South Carolina.**

To fulfill this mission,
Santee Cooper is committed to:

- being the lowest cost producer and distributor of reliable energy, water, and other essential services
- providing excellent customer service
- maintaining a quality work force through effective employee involvement and training
- operating according to the highest ethical standards
- protecting our environment
- being a leader in economic development

Advisory Board

Mark Sanford

Governor

Mark Hammond

Secretary of State

Henry D. McMaster

Attorney General

Richard A. Eckstrom

Comptroller General

Converse A. Chellis III

State Treasurer

Board of Directors

O.L. Thompson III

Chairman

At-large

Mt. Pleasant, S.C.

President and chief executive officer of O.L. Thompson Construction Co. Inc. that includes Thompson Trucking Co. and Wando Concrete.

G. Dial DuBose

First Vice Chairman

3rd Congressional District

Easley, S.C.

Real estate consultant at Nalley Commercial Properties in Easley, S.C.

Clarence Davis

Second Vice Chairman

2nd Congressional District

Columbia, S.C.

Partner in Nelson Mullins Riley & Scarborough LLP, a Columbia-based law firm.

Continued on page 6

Board of Directors (continued)

William A. Finn

1st Congressional District
Charleston, S. C.

Chairman of AstenJohnson, a specialty textile company for the printing and papermaking industries based in Charleston, S. C.

J. Calhoun Land IV

6th Congressional District
Manning, S. C.

Partner in Land, Parker and Welch, a general practice Manning law firm.

Dr. John Molnar

Horry County
Myrtle Beach, S. C.

Medical Director for Grand Strand Regional Medical Center, Emergency Department.

James W. Sanders Sr.

5th Congressional District
Gaffney, S. C.

Pastor of Bethel Baptist Church in Gaffney for 56 years and active in numerous civic and business organizations.

David A. Springs

Georgetown County
Murrells Inlet, S. C.

Retired consulting engineer for electric cooperatives and municipal utilities with Southern Engineering Co. of Georgia.

Cecil Viverette

At-Large
Hilton Head Island, S. C.

Retired president and CEO of Rappahannock Electric Cooperative in Virginia.

Barry Wynn

4th Congressional District
Spartanburg, S. C.

President of Colonial Trust Co., a private trust company specializing in investment management and estate services.

Note: The Berkeley County seat is vacant.

Executive Management

Lonnie N. Carter	President and Chief Executive Officer
Bill McCall	Executive Vice President and Chief Operating Officer
Elaine G. Peterson	Executive Vice President and Chief Financial Officer
James E. Brogdon Jr.	Senior Vice President and General Counsel
R.M. Singletary	Senior Vice President of Corporate Services

Management

Senior Vice Presidents:

Terry L. Blackwell	Power Delivery
Maxie C. Chaplin	Generation

Vice Presidents:

S. Thomas Abrams	Planning & Power Supply
Jeffrey D. Armfield	Business Services and Treasurer
Wm. Glen Brown	Human Resource Management
Zack W. Dusenbury	Retail Operations
Glenda W. Gillette	Controller
Thomas L. Kierspe	Engineering and Construction Services
L. Phil Pierce	Fossil and Hydro Generation
Suzanne H. Ritter	Corporate Planning and Bulk Power
Marc Tye	Conservation and Renewable Energy
Laura G. Varn	Corporate Communications and Media Relations

Thomas L. Richardson	Auditor ¹
Pamela J. Williams	Corporate Secretary and Associate General Counsel

¹Retired March 2008

Employees

Number of regular employees 1,811²

²As of December 31, 2007

In its 2007 annual report, the South Carolina Human Affairs Commission ranked Santee Cooper first among state agencies that employ more than 1,000 employees and second among all state agencies reporting for consistent recruitment and retention of a diverse work force.

Santee Cooper Regional Water System

Date construction began	February 1993
Date construction completed	September 1994
Construction cost	\$34.7 million
Commercial operation began	Oct. 1, 1994
Capacity of plant	36 million gallons per day (mgd)
Miles of pipeline	26 miles
Size of elevated storage tank	1 million gallons
Size of ground storage	10 million gallons
Water supply	Lake Moultrie

Water sold to:

- City of Goose Creek
- Berkeley County Water & Sanitation Authority
- Moncks Corner Public Works Commission
- Summerville Commissioners of Public Works

Water users: 136,000

Counties served: Berkeley and Dorchester

May 1, 2008, will mark the commercial operation date of the Lake Marion Regional Water System treatment plant, an 8-mgd facility that will be owned and operated by Santee Cooper.

Lake Information

	Lake Marion	Lake Moultrie
Acres	100,607	59,874
Maximum elevation	76.8 feet	75.5 feet
Gallons of water in Lakes Marion and Moultrie: 756 billion		
Length of dams and dikes: 40 miles		
Length of Tailrace Canal: 4 miles		
Length of Diversion Canal: 5 miles

Santee Cooper Green

Santee Cooper has nearly two dozen programs under its Santee Cooper Green umbrella, programs that fall into one of two camps: How Santee Cooper lives green, and How Santee Cooper helps others go green.

Santee Cooper lives green by generating renewable Green Power.

2007 Green Power sales:20,055 MWh

Green Power customers support the development of renewable Green Power by purchasing blocks each month through their bill. Renewable Green Power costs more to generate than Santee Cooper's traditional generation, and the money raised through Green Power sales is put entirely into the development of new renewable energy. Santee Cooper currently generates Green Power through landfill gas facilities and solar panels, and the utility is exploring the feasibility of wind generation and biomass.

2007 Green Power Customers¹

Coastal Carolina University Green Power Solar Pavilions	16 KWs	July 2006

¹Data as of Dec. 31, 2007.

²Green Power Partners are committed environmental stewards who have partnered with Santee Cooper in an effort to promote Green Power. To become a partner, these businesses agree to purchase a percentage of their electricity as Green Power.

How Santee Cooper Lives Green

Santee Cooper created a new *Department of Conservation and Renewable Energy* in 2007, led by a vice president reporting directly to the CEO. Focused on managing the utility's extensive conservation, energy efficiency and renewable energy programs, the department will ensure the proper resources are in place and give conservation efforts the attention, relevancy and focus they deserve.

In addition to generating renewable *Green Power*, Santee Cooper has a corporate *recycling* program that recycled more than 1 million tons of office waste and combustion byproducts in 2007, including nearly 90 percent of its fly ash and gypsum. The utility *teaches green* through programs including its annual summer Energy Educators Institute, its curriculum-enhancing environmental education programs at the Old Santee Canal Park and its Green Power Solar Schools program, which includes an extensive sixth grade curriculum for students in the utility's Green Power Solar Schools (a partnership with the state's electric cooperatives) and a summer institute to help teachers plan their Solar Schools lessons. Santee Cooper is practicing what it preaches on *conservation*, swapping out the incandescent light bulbs at its many facilities in 2007 for more energy-efficient compact fluorescent light bulbs. Perhaps most important, Santee Cooper has made a corporate *commitment* to reduce the greenhouse gases it emits through electricity generation, seeking to meet 40 percent of its customers' electricity needs by 2020 through non-greenhouse gas emitting resources, renewables, conservation and energy efficiency.

Go Green with Santee Cooper

Santee Cooper is committed to promoting a partnership of stewardship with its customers, developing and executing programs that helps others go green. Santee Cooper Green has 23 environmentally friendly programs, many of which are customer-focused.

Visit the website, www.SanteeCooperGreen.com and take a free *energy audit*. Engage in *smart energy planning* and check out options for increasing your home's energy efficiency with our *Good Cents* and *low-interest loan programs*. Santee Cooper continues to promote energy efficient lighting with its compact fluorescent light bulb (CFL) promotions. CFL bulbs use 75 percent less energy and last longer than traditional incandescent bulbs.

Santee Cooper operates the state's biggest do-it-yourself recycling program for used motor oil. Through *GOFER* (Give Oil for Energy Recovery), the utility collected 1,659,229 gallons of used motor oil in 2007 and burned it to generate electricity, representing 16,884,314 kilowatt-hours of electricity and a savings of more than \$1.1 million in fuel costs.

Santee Cooper introduced *Green Energy Buy Backs* in 2007, meaning the utility will pay customers for excess electricity they generate, through home solar panels or other renewable means, and get to our grid.

Environmental Stewardship

Santee Cooper has pioneered many environmental stewardship programs among utilities in South Carolina, from its decades-old efficient homes programs to 2007's Green Power Solar Schools launch. Here are some of the other ways Santee Cooper fulfills its ongoing commitment to the environment.

Environmental Control Technology

Santee Cooper has increased its generation, measured in terms of gigawatt hours, 20 percent since 2000 and 10 percent since 2006, with the Jan. 1, 2007 addition of Cross Unit 3. Through the use of state-of-the-art environmental control technology, Santee Cooper has significantly cut its emissions during this same time period. Specifically, sulfur dioxide emissions have dropped 26 percent since 2000 and nitrogen oxide emissions are down 60 percent in the same period. Environmental control technology installed at Santee Cooper units has enabled the utility to cut mercury emissions by 56 percent from 2000 to 2006, the latest year for which mercury emissions data is available.

Lakes and Vector Management

Protecting lakes Marion and Moultrie, South Carolina's largest freshwater resource, has always been of paramount importance to Santee Cooper since the reservoirs were completed in 1942.

With a combined 160,000 acres in five counties, the lakes host 48 water-quality monitoring stations. Monthly samples are analyzed by Santee Cooper's analytical and biological services department and data is shared with numerous state and federal agencies.

Maintaining water quality is important because since October 1994, the Santee Cooper Regional Water System, capable of providing up to 36 million gallons of water per day, has depended on Lake Moultrie as its water source. Four Lowcountry water utilities and 136,000 consumers in Berkeley and Dorchester counties count on this resource.

The 12-mgd Lake Marion Regional Water System, with a treatment plant located near Santee, S.C., is projected to be completed in 2008. Santee Cooper will also operate this treatment

Continued on pages 26-27

Environmental Stewardship (continued)

plant, which will be the source of water for several utilities in Berkeley, Clarendon, Dorchester, Orangeburg and Sumter counties.

Santee Cooper's vector management department battles mosquitoes in an environmentally friendly way. In 2007, the department's 11 employees traveled door to door through lake-front subdivisions, searching for potential breeding grounds and educating homeowners about techniques that discourage breeding. Vector Management also sets and inspects light traps loaded with carbon dioxide or "dry ice," which attracts mosquitoes. Technical associates routinely check the traps, and selected specimens end up under a microscope. This helps the department determine when and where to spray, using approved and environmentally friendly methods.

Wildlife Habitat Management

Santee Cooper nurtures wildlife habitats on its transmission line rights of way throughout the state, offering grants to people who lease the land and maintain it according to guidelines of the South Carolina POWER for Wildlife program.

Creating Sanctuaries for Wildlife

Santee Cooper and the S.C. Department of Natural Resources have a long history of working together to manage the lakes and the properties that surround the state's largest freshwater resource, through fisheries management and state wildlife management areas. Santee Cooper also supports the Santee National Wildlife Refuge in Clarendon County.

Forestry

Santee Cooper manages more than 27,000 acres of forest land around the lakes in Berkeley, Calhoun, Clarendon, Orangeburg and Sumter counties and in nearby Florence and Jasper counties.

Environmental Stewardship (continued)

Palmetto Trail

Santee Cooper helped blaze South Carolina's Palmetto Trail, a planned 162-mile long hiking, biking and camping pathway from the mountains to the sea. The trail's first segment opened in January 1996. The 24-mile long Lake Moultrie Passage created widespread access for hikers and cyclists to some of the most beautiful vistas around the lake it edges. It is one of three sections that Santee Cooper helped build and continues to maintain.

The other sections include the 20-mile long Eutaw Springs Passage and the 33-mile long Lake Marion Passage. Santee Cooper is also involved in the High Hills of the Santee Passage, a 9-mile long route that touches on upper Lake Marion and features a visitor center dedicated in spring 2008.

Old Santee Canal Park

The 195-acre park, whose construction was financed by Santee Cooper, opened in 1989. It features an interpretive center, theater and classroom. In 2007, the park expanded its environmental outreach by hiring an education coordinator focused on environmental programs, which has allowed the park to improve its programming. School children across the Lowcountry enjoy outings such as "Nature on the Go," essentially an abbreviated school field trip described as "taking the park to the school." The park's environmental programs emphasize the vast diversity of plant and animal life found throughout the park, covering topics such as insects, reptiles, trees and wetlands.

The park features two miles of boardwalk and hiking trails along Biggin Creek that parallel the Tailrace Canal. A large floating dock is inviting to boaters. The Stony Landing House, circa 1843, provides a scenic overlook at the point where the west branch of the Cooper River begins.

GOFER

GOFER, Give Oil for Energy Recovery, is Santee Cooper's used motor oil collection and recovery program. Santee Cooper started the GOFER program in 1990 to give people throughout South Carolina a convenient place to properly dispose of used motor oil.

Santee Cooper collected 1,659,229 gallons of used motor oil in 2007, representing 16,884,314 kWhs of electricity and a savings of \$1,140,822 in fuel costs.

Visit www.scgofer.org for more information.

Economic Development

The Power Team — Santee Cooper's economic development partnership with The Electric Cooperatives of South Carolina — significantly advanced development efforts throughout the state, especially in some of the more rural and economically challenged areas.

Since initiating new incentives in 2006, the Power Team has committed to more than \$1.2 million in grants to local agencies to certify sites, provide professional development and help with strategic planning for economic development agencies. Most of that commitment came in 2007.

Santee Cooper partnered with economic development teams to bring a \$5 million Builders FirstSource plant to the Loris Commerce Center and to announce a major Google facility in Berkeley County. The Builders FirstSource grand opening was in July, and construction is proceeding on the Google facility. American Gypsum is preparing for a grand opening of its manufacturing plant in Georgetown County, a partnership with Santee Cooper through which it provides wallboard from gypsum produced as a byproduct at Santee Cooper's Winyah Generating Station.

All told in 2007, the efforts of Santee Cooper and its partners resulted in 2,925 new jobs, \$891.3 million in capital investments and more than 28,650 new kilowatts of needed capacity.
