Evaluation and Process Improvement of Federal Excess Property for Fire Departments

Brad Bramlett
Federal Excess Property Manager
SC Forestry Commission
February 26, 2016
Problem Statement

Currently, there are two federal programs related to excess federal property in which the South Carolina Forestry Commission (SCFC) participates. There is a need to streamline the process for applying for federal excess property as well as tracking its location once it has been received and assigned.

History of the SC Forestry Commission

The South Carolina Forestry Commission (SCFC) was established in 1927 under SC Code of Law 48-23-10 (Appendix A). The original name of the agency was the SC State Commission of Forestry. The name was changed to the SC Forestry Commission in 1979. From the very beginning, the SCFC had 3 main roles: 1.) to protect the forest; 2.) to promote the benefits of forest management; and 3.) to monitor the forests’ conditions (Appendix B). Fire control efforts were of utmost importance within the fledgling agency. From the turn of the century up through the early 1900s, much of the forests had been decimated by overharvesting. Wildfires were common and very devastating. The first organized forest fire control efforts were initiated in 1928 when groups of landowners in cooperation with the S.C. State Commission of Forestry formed five forest fire protection organizations for the control of woods fires on some 195,000 acres of woodland. These Forest Protective Associations, as they were known, grew in number and size until 1944 when 24 counties had organized fire protection organizations. In 1945 the General Assembly passed the South Carolina Forest Fire Protection Act which extended organized forest fire protection to every county in South Carolina - the first of any of the southeastern states to take such a step (Appendix B).
History of the US Forest Service

The US Forest Service (USFS) has been around for over a century. In 1876, Congress created the office of Special Agent within the US Department of Agriculture. The main goal was to "assess the quality and conditions of forests in the United States". In 1891, the Department expanded the office into the Division of Forestry. In 1905, President Theodore Roosevelt transformed the agency into what is now the present day Forest Service. Gifford Pinchot was tasked as the agency's first Chief (Appendix C).

Federal Excess Equipment- FEPP

The SCFC oversees two types of federal excess equipment programs in the State of SC. Both of the programs are through a partnership with the USFS. The first program is the Federal Excess Personal Property (FEPP) program. This program was started in 1956 as a program between State Foresters (state forestry agencies) and the USFS. The SCFC has been participating for several decades. This program was started as a way to assist fire departments in wildland firefighting. Most of the property originally belonged to the Department of Defense (DoD). The USFS obtains ownership of excess DoD equipment at military bases located around the country. The USFS then allows the equipment to be "loaned out" to fire departments (Appendix D). Each state forestry agency oversees the program within that state. This involves keeping an accurate and up to date inventory. The USFS requires that each piece of equipment be physically inventoried every two years. Table 1 below shows the number of pieces of FEPP equipment in SC (as of June 30, 2015) and the total value. The USFS retains ownership of all FEPP equipment. Fire departments may keep equipment as long as they want to, as long as they follow federal program guidelines.
Table 1: Status of FEPP in SC (as of June 30, 2015)

Why is it called “Property” and not “Equipment”?  
It refers to anything tangible, which is NOT real estate.

Some of the more common items include things like pickup trucks that are utilized as “brush trucks”. This is a very inexpensive way for a fire department to convert a truck into a functioning firefighting apparatus.

Generators are another popular item that the fire departments use to their benefit. Some are set up permanently at the fire department to run the station, in the event of a power failure. Another option is to mount the generator on a trailer that can be taken out to the incident. This also includes items such as fire hose, trailers, air compressors, fire trucks, and many more ... but.. NOT BUILDINGS OR LAND. The SCFC also uses FEPP items. The SCFC utilizes fixed-wing aircraft (ex- Cessna 172, 182) for wildfire detection and suppression. All twelve of our aircraft are FEPP equipment.

How does the property become available?  
As was mentioned earlier, most FEPP comes from military bases. When the DoD is no longer using property, it is obtained by the USFS. They in turn make it available to the states (Appendix E). Our agency has personnel that go online and “screen” for equipment that is wanted by fire departments. In order for a fire department to request equipment, they must first complete and sign a Memorandum of Understanding (MOU) with the SCFC (Appendix F).
I received approval from the FEPP/FFP Coordinator with the USFS in Atlanta to update this form, along with the Equipment Loan Agreement and the Firefighter Property (FFP) Program. I also had to get a ‘Delegation of Authority Letter’ from the State Forester so that I could sign these aforementioned forms and not have to get the state forester to sign them. The newly updated MOU is found in Appendix G. They must also complete and sign a Request for Federal Excess Property (Appendix H) form. Their request is logged onto an Excel spreadsheet (Appendix I). Equipment is screened based on the requests on file. When an item becomes available online, our screeners are “competing” with other state forestry agencies around the country. All equipment that is “camo” colored, must be painted.

All vehicles are required to be housed (kept under roof). When the fire department is finished with an item, it is their responsibility to return it to the SCFC Columbia Warehouse. The items are then put on a General Services Administration (GSA) sale that is open to the public. All proceeds of the sale go to the US Treasury with GSA paid administrative fees.

All vehicles must have “Loaned by:” stickers
Federal Excess Equipment- FFP

The second, and much newer, program is called the Firefighter Property (FFP) program. In 2004, federal Legislation was passed authorizing firefighting and emergency service agencies into a higher screening authority as one of the DoD Special Programs. In August of 2005, the Forest Service signed a Memorandum of Agreement with the Defense Logistics Agency (DLA) authorizing the Forest Service to manage FFP.

On March 22, 2006 Arkansas Forestry Commission acquired the first piece of FFP

The cost to put this truck into service was $10,036. A huge savings to the Fire Department!
Comparison of the two programs

</tbody>
</table>

The FFP program is the primary one we are using to screen for federal excess property. Most of the equipment is newer than those in the FEPP program. The biggest advantage to FFP is that once a fire department gets the item, and puts it into service, it becomes theirs after one year. That means we don’t have to inventory it after one year. There is some cost associated. The fire department has to pay a $50 administrative charge for each item. There is also a $2.50 charge per mile transportation fee, round trip, to pick up the item(s) at the military base. It does involve more work for us up front. There are forms that we must take to the base in order to get the item. It must also be “receipted” into Federal Excess Property Management Information System (FEPMIS). This is a federal database for all equipment. Receipting the item involves
uploading pictures and indicating where the item has been assigned. Our agency also screens FFP equipment for us to use. These mainly include items such as forklifts, ATVs, trucks, generators, etc.

Disposal of FEPP Equipment

When a fire department is finished using FEPP items, they are required to return them back to our Warehouse in Columbia. Our Warehouse Manager (Billy Cockrell) receives the item and has the fire department representative to sign a FEPP Turn-in Sheet (See Appendix J). Once there are at least 20 items that have been returned, we start setting up a sale through General Services Administration (GSA). The Warehouse Manager has a long Excel spreadsheet (See Appendix K) that he uses to “write up” the sale. This involves getting the pertinent information needed for the sale. Some of the needed info includes: Lot# (this is the number we designate for each item), State and Federal #, the item description, the make/model/serial #, the # of miles or hours, etc. Once all the data has been gathered for the sale, the sheet is then given to Judy Lucas. She then enters all this info into the computer and it is uploaded to the GSA website. One of the problems is that sometimes numbers are not legible (since they are hand written). Judy will call down to get further clarification. GSA then advertises the sale on an online auction site. The successful bidder receives the “Purchasers Receipt” for each item. That receipt MUST be brought in to our Warehouse and presented before we will release the item to the buyer. Both the purchaser and a SCFC representative sign the Purchasers Receipt (Appendix L). The buyer gets a copy and we scan and e-mail the original in to GSA and USFS. Finally, that item is removed from our inventory.
Recommendations to help the GSA sale

As you will see in Appendix K, the write up for the sale is a tedious process. I interviewed one of our communication/computer managers about what he recommends as a means of taking this info electronically. He recommended a Microsoft Surface 3 (Appendix M) since it has Excel. This innovative tablet can be used to enter the data directly into the Excel spreadsheet. It can also be used to take a picture of the item. I have since updated that GSA sale form (Appendix N). I can load the new GSA sale spreadsheet onto the Surface 3. Then, Billy can take that out with him, and he can enter the data directly into the tablet. It is also capable of taking pictures. The sale requires pictures of each item. Consequently, Billy can take those pictures while he is out there. I also agree that a tablet would be a great benefit for the GSA sale.

Newer ways to keep up with inventory

I interviewed someone on our GIS staff. I was trying to get info concerning using QR scanner to identify a specific item. He said that there are programs where info can be entered into a database and that a QR code label can be printed. I envision that once we get smart phones, they can be utilized during the federal excess inventory done every two years. One of the challenges will be the monumental task of entering in data for approximately 900 items. What I would like to do would be to start off small and do this for the few dozen items we have here in Columbia. Then, slowly expand this over time, or as new items come in. I recommend that I get a smartphone to use to set up the QR code system. I would also use the smartphone to log into the Defense Logistics Agency (DLA) website to approve equipment our personnel have screened. I also called and talked with my counterpart in Wyoming. She said that they have their own state inventory system. They use something similar to a portable “bar code” reader.
Interviews from Sector Fire Supervisors

I interviewed 3 of our Sector Fire Supervisors (previously called rangers) to get input on how they viewed the federal excess program and any comments they had. Below are the structured questions I asked each of them.

**Question 1:** What are the major issues with Federal Excess Personal Property (FEPP) program?

**Jon Barker (Spartanburg/Union counties)**—"A piece of equipment has been moved (by the fire department) and they can’t find it. Ex.- an item was at the Inman Armory, and not the fire station. Good pictures are a necessity. Used to be an issue where an item was assigned to one fire department, but transferred to another (department) without our (SCFC) approval, but this is very rare now. Seeing some vehicles not covered/housed (being covered is a requirement of the program)".

**Gray Vallentine (Berkeley/Charleston counties)**—"The ability to coordinate with fire departments to get access to (inventory) equipment. It is a challenge/difficult to arrange a meeting (with fire department members) since most are volunteer firefighters, when doing the inventory. Getting the fire departments to comply with the FEPP guidelines- they are in non-compliance (ex- not getting the equipment painted).”

**Brandon Craig (Horry/Marion counties)**—"The fire departments have a bigger imagination to get the equipment set up properly- they imagine it way better than it actually turns out. They have good intentions but it doesn’t work out that well. Also, some problems storing it at another location- it is ‘out-of-sight, out-of-mind’. Then, it gets into a state of disrepair, and (they) don’t have a way to haul it.”
Question 2: If you had a magic wand and could do anything in the program, what would you do?

Jon Barker (Spartanburg/Union counties)- “To limit what certain departments get-make sure that whatever the fire department gets, that they use it. If they aren’t using it, they need to turn it in”.

Gray Vallentine (Berkeley/Charleston counties)- “To be able to enforce the guidelines swiftly; to make the ability to tow in the old equipment easier.”

Brandon Craig (Horry/Marion counties)- “If they (fire department) have something in the old program (FEPP), try to turn it in and get something similar to it in the new program (under FFP).”

2014 USFS Audit Findings

The USFS conducted an Audit October 27-30, 2014 on our FEPP/FFP. USFS personnel from Atlanta, Washington DC, and California were present to audit our federal excess property programs. Three teams divided up and conducted field visits. One USFS personnel was on each team, accompanied by two SCFC personnel. The audit went well and the USFS sent us a report several months later. Most of the issues were very minimal involving incorrect federal numbers on equipment. Those were easily rectified. More pressing issues were items such as some vehicles still had military camo. Others involved equipment not being used. The fire departments were notified and a vast majority of the discrepancies have been corrected.

Several pieces of equipment have been returned by the fire departments. I have made a response report and currently finalizing the results. This audit has brought to light the importance of field personnel keeping close involvement with their local fire department. It also showed how complex it is to keep up with several hundred pieces of equipment. That is one
reason I would like to see a QR code scanning system put in place. I have personally made
phone calls to fire chiefs explaining to them the importance of following federal guidelines.
Those fire departments that have not followed these guidelines have been placed on a “DO NOT
ISSUE” list. This means that they are not allowed to receive any more federal excess property.
This also makes them ineligible for the Volunteer Fire Assistance (VFA) grant program that I
also oversee. The VFA program allows fire departments to apply for a 50-50 matching grant up
to $5,000.

Summary
My ultimate goal is to streamline the process for applying for federal excess property as well as
tracking its location. All forms related to this process have been updated. These forms are more
“user friendly”. They should also be of time savings. The actual “request list” have been
updated. This is the first major revision is at least three years. A column for the Federal Supply
Classification (FSC) was added. This is helpful to sort data (ex- by the number of trucks
requested). This is also used when I have to do an Acquisition Plan. This involves letting the
USFS know what our total expected request of items will be. I recommend that as the sector fire
supervisors are out working in their counties, to be proactive and periodically check on federal
excess equipment in their counties. If any discrepancies are found, they can be dealt with right
away. I’m also thinking about developing a quarterly or semi-annual newsletter to send out to
fire departments around the state. Some issues I have discovered in tracking FFP is that pictures
are not being uploaded into FEPMIS. As the yellow “Loaned by:’ stickers are required for FEPP
vehicles, we have green “Provided by:” stickers that are required. We
have discovered that these don’t always get distributed to the fire
department receiving FFP equipment. Therefore, I have developed a new form that can be used to ensure that each step in the process is not left out or overlooked (Appendix O). This checklist has been used and has helped to streamline the process. I plan to quarterly check the FEPMIS database to ensure FFP equipment has been put into service within the allotted timeframe. I will follow up with any fire department that does not meet this requirement. I am also going to ask the fire sector supervisors to pass along pertinent federal excess property information (ex- when bi-annual inventory will take place, updates in the program, etc.) to the fire departments at their local fire chiefs’ associations meetings.

Title 48 - Environmental Protection and Conservation

CHAPTER 23

Forestry Generally

SECTION 48-23-10. State Commission of Forestry.

There is created and established a State Commission of Forestry to consist of nine members, each of whom shall be a resident of this State and shall be appointed by the Governor. Of this commission, two members shall be practical lumbermen, one member shall be a farmer who is a landowner, three members shall be selected and appointed from the public at large, two members shall be appointed by the Governor from the public at large upon the advice and consent of the Senate and the ninth member shall be the President of Clemson University or the Dean of the School of Forestry to serve as his designee on the commission. The members of the commission shall be selected and appointed with reference to their knowledge of and interest in the forests of the State and the products derived therefrom. In making his appointments, the Governor shall make all reasonable effort to provide representation from every geographical section of the State and a reasonable balance between the interests of corporations and individuals.

History of the Forestry Commission

The South Carolina Forestry Commission was established by law in 1927. At its inception, the agency had three charges - to protect the forest, to promote the benefits of forest management, and to monitor the forests' condition. At that time, our forest land had been heavily cut over and was eroding badly from poor farming practices. Today South Carolina's forests provide the raw material for the state's forest products industry - the largest manufacturing industry in South Carolina.

Interest in the reforestation and protection of forest land in South Carolina began as early as 1787 when a law was passed which provided for the punishment of any person who willfully, maliciously, or negligently caused fire to do damage to the property of another. Between 1787 and 1912 some eleven bills were passed concerned with forestry, largely dealing with the protection of the forest from fire. Increasing activities in lumber and naval stores directed the attention of thoughtful individuals to the quickly disappearing timber supply. The future of South Carolina's forest resources was headed toward crisis when the General Assembly created the State Commission of Forestry on April 26, 1927.

The first organized forest fire control efforts were initiated in 1928 when groups of landowners in cooperation with the S.C. State Commission of Forestry formed five forest fire protection organizations for the control of woods fires on some 195,000 acres of woodland. These Forest Protective Associations, as they were known, grew in number and size until 1944 when 24 counties had organized fire protection organizations. In 1945 the General Assembly passed the South Carolina Forest Fire Protection Act which extended organized forest fire protection to every county in South Carolina - the first of any of the southeastern states to take such a step.

Paralleling the growth of forest fire protection, reforestation of cutover and idle land started demanding increased emphasis. Just two years after the Act creating the State Commission of Forestry, the General Assembly authorized the establishment of a state nursery to grow forest tree seedlings. The Commission was an early leader in the improvement of forest genetics. In 1961 South Carolina improved the quality of the seedlings by establishing seed orchards of superior trees through a cooperative Tree Improvement Program involving both state and industrial interests.

Farmers and other landowners began receiving direct assistance in managing their forest land in the winter of 1930-31 as a demonstration in Fairfield County. Proper thinning techniques, timber measurement and the use of equipment in the suppression of forest fires were demonstrated. Two years later such demonstrations were held in 33 counties in cooperation with the county agricultural agents. Such direct landowner assistance has grown and expanded to include individual forest land examinations.

Education has been a prime function in the fields of fire protection, reforestation, and forest management. In 1931 the forestry field was given an educational boost. Forestry was added as a study in Vocational Agriculture classes throughout the state. Today environmental educational programs such as Project Learning Tree (PLT) and Teaching Kids About the Environment (KATE) are increasing the understanding of the importance of our forests.

At present, the Forestry Commission has about 350-employees and is charged with protecting and enhancing South Carolina's forest resources. Forest firefighters are based in every county for quick response to wildfires, and project foresters are available to assist landowners throughout the state. Three regional dispatch centers coordinate statewide forest protection. The Commission operates five state forests, and a modern forest nursery which grows over 17 million containerized and bareroot seedling species for S.C. landowners. The Commission continues to provide a range of educational programs to better inform the state's citizens concerning the wise use and management of South Carolina's forest resources.
APPENDIX C

Website location: http://www.fs.fed.us/learn/our-history

Our History

Federal forest management dates back to 1876 when Congress created the office of Special Agent in the U.S. Department of Agriculture to assess the quality and conditions of forests in the United States. In 1881 the Department expanded the office into the Division of Forestry. A decade later Congress passed the Forest Reserve Act of 1891 authorizing the President to designate public lands in the West into what were then called “forest reserves.” Responsibility for these reserves fell under the Department of the Interior until 1905 when President Theodore Roosevelt transferred their care to the Department of Agriculture’s new U.S. Forest Service. Gifford Pinchot led this new agency as its first Chief, charged with caring for the newly renamed national forests.

APPENDIX D

Website location: http://www.fs.fed.us/fire/partners/fepp/index.html

What is FEPP?

The Federal Excess Personal Property (FEPP) program refers to Forest Service-owned property that is on loan to State Foresters for the purpose of wildland and rural firefighting. Most of the property originally belonged to the Department of Defense (DoD). Once acquired by the Forest Service, it is loaned to State Cooperators for fire fighting purposes. The property is then loaned to the State Forester, who may then place it with local departments to improve local fire programs. State Foresters and the USDA Forest Service have mutually participated in the FEPP program since 1956.

MEMORANDUM OF UNDERSTANDING (MOU)

This memorandum made by and between the South Carolina Forestry Commission, an agency of the State of South Carolina, hereinafter referred to as the COMMISSION, and the ________________, hereinafter referred to as FIRE DEPARTMENT.

INTRODUCTION
Because of the intermingling of structures and natural cover fuels in unincorporated areas of __________ County, the objectives of the two above-named organizations are inseparable; i.e., to minimize the loss of life and property as a result of uncontrolled fire. Recognizing this, we, the undersigned, have arrived at the MEMORANDUM OF UNDERSTANDING for these primary purposes:

1. Provide for closest possible cooperation on mutual objectives
2. Prevent misunderstanding as to purpose and responsibilities of our respective organizations
3. Make possible effective support between organizations

To implement this program, the following information as to organization makeup is exchanged:

FIRE DEPARTMENT MUST BE COMPLETED (may attach separate pages as needed)

1. AREA COVERED: attach a narrative description and/or map
2. SOURCE OF FUNDS: list for example -- tax district, donations, county funds, other sources
3. FACILITIES: LIST BY STATION
   a. Equipment: kind and type of equipment/vehicles
   b. Manpower: number paid vs. volunteers
4. TYPE ORGANIZATION (Volunteer, Subscription, Tax District, Municipal)
5. National Incident Management System NIMS compliant: YES ___ NO ___

SOUTH CAROLINA FORESTRY COMMISSION
1. AREA COVERED: The state of South Carolina except for incorporated areas and federal lands not under specific agreement
   Note: Equipment may be sent into incorporated areas upon request of the municipal fire department
2. SOURCE OF FUNDS: State appropriations, supplemented by federal matching funds
3. FACILITIES
   a. Equipment: primary equipment is type 5 tractor/plow unit which may have a blade
   b. Manpower: assigned firefighters with additional personnel available as needed
4. RESPONSIBILITIES: To provide a statewide system of fire protection on all lands outside of corporate limits which support enough growth or have sufficient inflammable debris or grass to constitute, in the judgment of the COMMISSION, a fire menace to itself or adjoining lands
APPENDIX F (page 2 of 2)

OPERATIONAL PROCEDURES
In areas of mutual interest, we agree to the following operational procedures:

1. DISPATCHING:
   a. The COMMISSION will dispatch personnel and/or equipment to any known forest, brush, grass, fire; to any fire of unknown character; or to any fire at the request of the FIRE DEPARTMENT.
   b. The FIRE DEPARTMENT will dispatch personnel to any known structure, building, residence fire; to any fire of unknown character; or to any fire at the request of the COMMISSION.

2. COMMUNICATIONS: Having knowledge of same, the COMMISSION will immediately advise the FIRE DEPARTMENT of any burning or threatened structure within the FIRE DEPARTMENT's area of operation. (FIRE DEPARTMENT's area of operation shown on attached map).

3. MUTUAL ASSISTANCE:
   a. Suppression - When both parties are at the same fire, unified command will be utilized as appropriate.
   b. Training - Each party agrees to participate in those portions of the other party's training program when such training could be mutually beneficial.
   c. Each party agrees to lend its support to fire prevention programs of the other party which will increase the public awareness of the hazard and destruction of fire and/or make the purpose of this Agreement possible.

The South Carolina Forestry Commission and the USDA Forest Service prohibit discrimination on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue SW, Washington, DC 20250-9410; call (voice or TDD). The SC Forestry Commission and the USDA Forest Service are equal opportunity providers and employers.

This agreement will be effective from the date of execution by the STATE FORESTER and will continue in force from year to year subject to any amendments which may be made hereof by mutual agreement of the parties, or unless terminated by either party by thirty (30) days written notice to the other, provided, however, that all of the provisions herein are complied with. This agreement must be updated every three (3) years to reflect any changes which may occur within the Commission or Fire Department.

SOUTHCAROLINA FORESTRY COMMISSION

By: ____________________________ Witness: ____________________________

Date: ____________________________
MEMORANDUM-OF-UNDERSTANDING-(MOU)--1
between the FIRE DEPARTMENT-1
and the SOUTH-CAROLINA-FORESTRY-COMMISSION-1

This memorandum made by and between the South Carolina Forestry Commission, an agency of the State of South Carolina, hereinafter referred to as the COMMISSION, and the Fire Department, hereinafter referred to as FIRE DEPARTMENT, for the purpose of:

1. Providing for closest possible cooperation on mutual objectives.
2. Preventing misunderstanding as to purpose and responsibilities of our respective organizations.
3. Making possible effective support between organizations.

To implement this program, the following information as to organization makeup is exchanged:

FIRE DEPARTMENT: MUST BE COMPLETED (may attach separate pages as needed)

1. AREA COVERED: attach a narrative description and/or map
2. SOURCE OF FUNDS: List for example: tax district, donations, county funds, other sources
3. FACILITIES: List by station:
   a. Equipment: kind and type of equipment/vehicles
   b. Manpower: number paid vs. volunteers
4. TYPE ORGANIZATION (Volunteer, Subscription, Tax District, Municipal)
5. National Incident Management System NIMS compliant: YES NO

SOUTH-CAROLINA FORESTRY COMMISSION:

1. AREA COVERED: The state of South Carolina except for incorporated areas and federal lands not under specific agreement.
   Note: Equipment may be sent into incorporated areas upon request of the municipal fire department.
2. SOURCE OF FUNDS: State appropriations, supplemented by federal matching funds.
3. FACILITIES:
   a. Equipment: primary equipment is type 5 tractor/plow unit which may have a blade.
   b. Manpower: assigned firefighters with additional personnel available as needed
4. RESPONSIBILITIES: To provide a statewide system of fire protection on all lands outside of corporate limits which support enough growth or have sufficient inflammable debris or grass to constitute, in the judgment of the COMMISSION, a fire menace to itself or adjoining lands.
APPENDIX G (page 2 of 2)

OPERATIONAL PROCEDURES
In areas of mutual interest, we agree to the following operational procedures:

1. DISPATCHING:
   a. The COMMISSION will dispatch personnel and/or equipment to any known forest, brush, grass fire, to any fire of unknown character, or to any fire at the request of the FIRE DEPARTMENT.
   b. The FIRE DEPARTMENT will dispatch personnel to any known structure, building, residence fire, to any fire of unknown character, or to any fire at the request of the COMMISSION.

2. COMMUNICATIONS:
   Having knowledge of same, the COMMISSION will immediately advise the FIRE DEPARTMENT of any burning or threatened structure within the FIRE DEPARTMENT'S area of operation (FIRE DEPARTMENT'S area of operation shown on attached map).

3. MUTUAL ASSISTANCE:
   a. Suppression -- When both parties are at the same fire, unified command will be utilized as appropriate.
   b. Training -- Each party agrees to participate in those portions of the other party's training program when such training could be mutually beneficial.
   c. Each party agrees to lend its support to fire prevention programs of the other party which will increase the public awareness of the hazard and destruction of fire and/or make the purpose of this Agreement possible.

This agreement will be effective from the date of execution by the COMMISSION/FFP/FEPP Manager, and will continue in force from year to year subject to any amendments which may be made hereof by mutual agreement of the parties, or unless terminated by either party by thirty (30) days written notice to the other. Provided, however, that all of the provisions herein are complied with. This agreement must be updated every three (3) years to reflect any changes which may occur within the Commission or Fire Department. Also, this agreement must be updated if there is a change in the fire chief.

<td></td>
</tr>
</tbody>
</table>

Note: Only 1 of each item above may be requested.

Maximum Amount Fire Department is willing to spend on equipment if FFP: $0

Other: Be SPECIFIC

Is the property being requested thru: 
- ✔ FEPP
- ✔ FFP
- ☐ or Either

Mail original, signed request to:
South Carolina Forestry Commission
Federal Excess Property Coordinator
P.O. Box 217074
Columbia, SC 29221-1707

**IMPORTANT MESSAGE:**

By signing this form, you are giving the Forestry Commission the right to screen an item on behalf of your fire department. You are also stating that if you currently have any federal excess property, the inventory is up to date, and equipment is used per agreement. When fire department is finished with FEPP equipment no longer in use, it is the department's responsibility to return it to Columbia. FEPP equipment is the property of the U.S. Forest Service.

**NOTE:** Requests for equipment will be filled on a "first come, first served" basis. This request will only be active for 3 years. If you want to keep it active longer, and remain in the same place on the list, you will need to complete another request and MAIL in the original.

Following forms are needed: 
- ☐ MOU
- ☐ Equipment Loan Agreement
- ☐ FFP Agreement
- ☐ None

Entered to Request spreadsheet: ☐

Checked the "Do NOT issue" List: ☐

Revised: 01-19-16
