Unemployment Rate Falls for the Seventh Month

South Carolina's seasonally adjusted unemployment rate fell from 9.3 percent in January to 9.1 percent in February, reflecting a seven-month trend of rate declines. Increases in employment within the Leisure and Hospitality, Professional and Business Services, and Health Care and Social Assistance industries helped add 9,864 people to the employed rolls. This made February the third largest month-to-month gain in employment in South Carolina since 1976, which was the first year the Bureau of Labor Statistics made the monthly data series available.

In February, the number of individuals employed totaled 1,961,103, while the unemployed fell by 4,137 to 196,746. Nationally, the unemployment rate remained flat at 8.3 percent for February.

Since February 2011, there has been little change in the overall labor force; however, employment has improved, climbing about 32,560. Over the year, employment increases have been highest in Horry County (+5,430) and Richland County (+4,750), with Greenville, Charleston, and Beaufort Counties also reporting increases of over 4,400 each.

U.S. & S.C. Unemployment Rates
February 2011 through February 2012

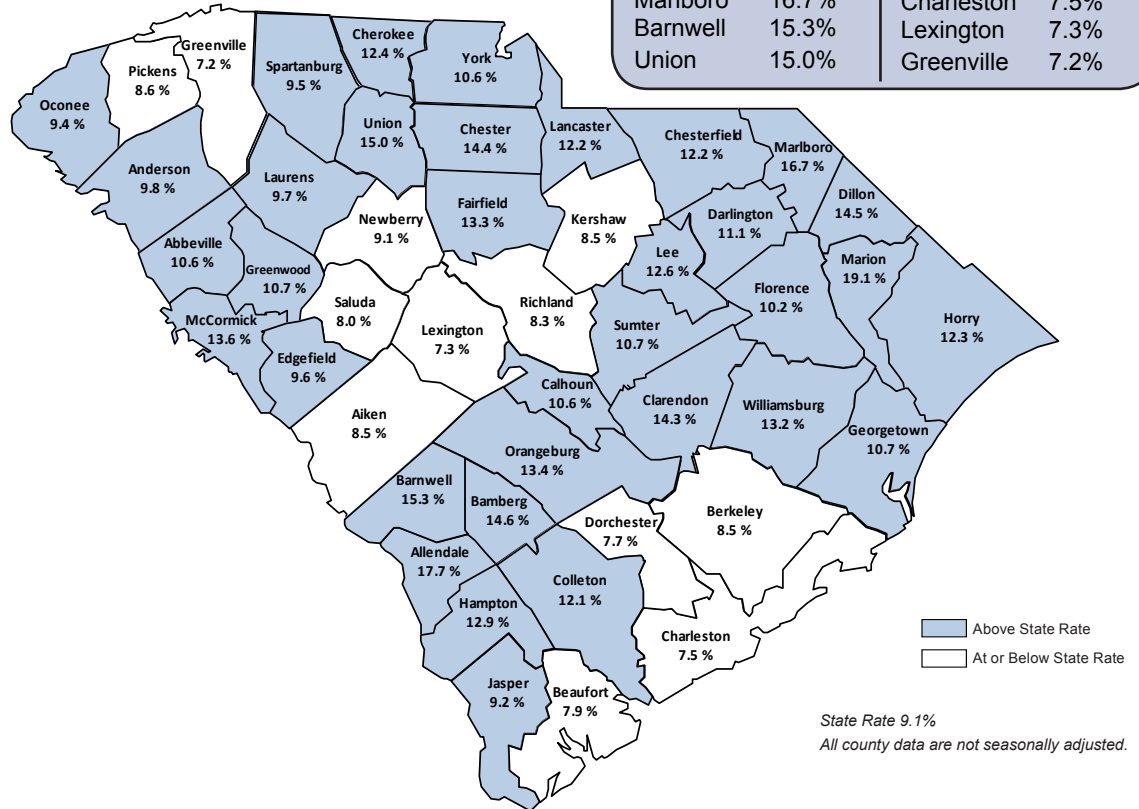

Insights is prepared in conjunction with the U.S. Department of Labor, Bureau of Labor Statistics. The current month's estimates are preliminary, while all previous data are subject to revision. All estimates are projected from a first quarter 2011 benchmark.

North Dakota	3.1

Twenty-four of the 46 counties in South Carolina saw declines in their unemployment rates for February, with York and Chester Counties having the largest decreases, 1.9 and 1.0 percent, respectively. Unemployment rate increases were reported in 18 counties. The largest gains were in Anderson and Darlington Counties (0.8 percent each), and four counties showed no change from the previous month. Since February 2011, only one county (Edgefield) has seen an increase in its unemployment rate. York County dropped 4.9 percent over the year, primarily due to people leaving the labor force.

South Carolina Monthly Employment Trends

South Carolina saw further positive indicators in the not seasonally adjusted nonfarm employment, which increased by 17,900 jobs from January to February. Most of the gain (+10,100) was from increases in Education (K-12 schools, and private and public universities) as institutions completed staffing for the spring semester. Three industrial sectors had robust gains in employment: Professional and Business Services (+3,900), Health Care and Social Assistance (+3,200), and Leisure and Hospitality (+2,700). Even though it registered a small gain, Manufacturing (+300) continued to grow. Retail Trade reflected its usual decline (-1,700) for this time of year, while Financial Services fell (-1,000).

Of the state's Metropolitan Statistical Areas (MSAs), Columbia (+3,300), Greenville (+1,800), Spartanburg (+700), and Myrtle Beach (+700) saw the largest increases. Charleston (+600) and Sumter (+300) noted smaller gains, and Anderson experienced a decline (-600). Since February 2011, South Carolina has seen an overall increase of 28,000 jobs. Manufacturing led the over-the-year rise with an estimated 9,500 additional jobs. Employment Services (a subset of Professional and Business Services) climbed 5,200, and Leisure and Hospitality rose 4,000. Health Care and Social Assistance (+3,800) and Transportation and Warehousing (+2,900) also added to the gains in the last twelve months.

Since February 2011, the state has seen growth primarily in the private sector. Trade and Transportation, Leisure and Hospitality, and Professional and Business Services have been bright spots for the state. Transportation Equipment, along with Primary Metal and Fabricated Metal has led the Manufacturing segment. Combined, these sectors have continued to move the state forward in job growth. The state's job growth outlook remains optimistic for the near future, especially in the Leisure and Hospitality/Tourism-related industry. Many recent job announcements in the Manufacturing sector bode well for mid-term and long-term outlook.

February Initial Unemployment Claims

Initial claims for February, followed the annual trend they have for several years, with January numbers being high and February showing a significant drop. Initial claims plunged 16,971 from January. Regular unemployment benefits paid during February also dropped \$8,675,287. The number of regular benefits exhaustions decreased 1,514 from January to February. The weekly benefits averaged \$236.53.

Online job advertisements in South Carolina had an increase of approximately 900 (to 50,900) ads from January to February, as reported by the Conference Board's Help Wanted Online Index, which is an independent business and research association working in the public interest. This represents a gain in job advertisements of approximately 1,000 online postings from a year ago. On the national level, there was a similar rise in total ads (+39,900) for February.

Ads were most significant in the Trident workforce area (10,635) and the Midlands area (9,879). Of all online ads, Healthcare Practitioners and Technical Occupations (10,005) had the highest number of advertisements in the state. The jobseeker per job opening rate was 3.9 in February, dipping slightly from 4.0 in January.

The table below shows a breakdown of numbers and a ratio and of jobseekers to job openings by workforce area.
