ENTERPRISE CONTENT MANAGEMENT SYSTEM

SC DEPARTMENT OF SOCIAL SERVICES

The South Carolina Department of Social Services (SCDSS) is seeking a Quote for an Enterprise Content Management System (CMS). All Quotes are due by 9/30/2015 at 8:00am and must be submitted via email to:

SC Department of Social Services
Attn: Victoria Giles,
Michele.mahon@dss.sc.gov

Submitting a quote does not guarantee that you will be selected as the provider. A subsequent Invitation for Bid may be posted. Quotes must be valid for 60 days. The following information may assist you in determining a fair market quote:

Purpose -- The South Carolina Department of Social Services (SCDSS) invites prospective vendors to submit responses to its request for quote for an Enterprise Content Management System (CMS). The Department of Social Services is one of South Carolina's largest agencies, with approximately 3,785 employees.

Employees utilize the website every day for information and assistance in their day-to-day tasks. They also look to the website for news and official announcements. An organized, consistent website can increase organizational efficiency. Using our website more effectively as a communication tool can increase employee involvement and engagement.

It is imperative that SCDSS utilizes its web site as a platform for communicating agency news, client testimonials, career opportunities, and other agency specific information. SCDSS also realizes the importance of providing constituents with a user friendly solution which the new web site will achieve.

Background -- The SCDSS website is comprised of original content, along with related hyperlinks, categorized, qualified, described, and presented in a variety of different formats, e.g., arranged by topic, or alphabetically. Content may appear multiple times across the site, and in a variety of different formats (for example, in a list on a page, and as a clickable image in a sidebar box). We wish to implement a classification scheme, whereby content contributors can change content once and see that change ripple across the site to all components that contain that content, and we need a CMS that can perform this functionality with minimal customization. In addition, web technologies are evolving, and we want to use current technology (and other future web technologies as they are created) to improve the interaction between the citizen and the Agency's web presence.

Content collections may change in the future, therefore, the Content Management System must provide a means to create, maintain, and retire content groups.
