Project Description: The construction site is located at 197 Viking Circle, Denmark, SC 29042.

Construction is expected to begin in April of 2018 and last 20-21 months. The Project will involve the construction of 66,000 square feet of new K-6 school facility space built to adjoin 98,000 square feet of existing building space, which will be renovated to house grades 7 through 12. It is possible that 7,500 additional square feet of new construction will be built to adjoin existing space. In addition, school amenities, including sports facilities, a playground, and an auxiliary storage building will also be constructed.

The Project will be built in phases, as the existing campus will remain occupied. This will impact testing schedules/frequencies. The civil will be split into two major phases, the initial new construction phase and then the renovation of existing space phase. During the second phase, the existing space will be divided by wing. Each Phase will require the fire sprinkler, fire alarm, emergency lighting, and deficiency logs (provided by inspector) reviewed. There will be potentially 5 OSF Overhead inspections and 5 OSF final inspections due to the phasing and the need to “open one and close one.”

The Project is being financed with a guaranteed loan from the United States Department of Agriculture. USDA will require 3 onsite inspections per week, although the inspector may determine that additional inspections are required some weeks. The inspector selected will be required to execute required USDA certifications and meet USDA requirements for businesses receiving federal funds.
