UNIVERSITY OF SOUTH CAROLINA
NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS

NOTE 1 - BASIS OF PRESENTATION

The accompanying schedule of expenditures of federal awards (the schedule), includes the federal grant activity of the University of South Carolina (the University), and is presented on the accrual basis of accounting. The information in the schedule is presented in accordance with the requirements of Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in the schedule may differ from amounts presented in, or used in, the preparation of the basic financial statements.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES FOR FEDERAL AWARD EXPENDITURES

Expenditures for student financial aid programs include the federal share of students' Federal Supplemental Educational Opportunity Grant (FSEOG) program grants and Federal Work Study (FWS) program earnings, certain other federal financial aid for students and administrative cost allowances, where applicable.

Expenditures for federal research and development programs are determined using the cost accounting principles and procedures set forth in OMB Circular A-21, *Cost Principles for Educational Institutions*. Under these cost principles, certain expenditures are not allowable or are limited as to reimbursement.

Expenditures for nonfinancial aid awards include indirect costs, related primarily to facilities operation and maintenance and general, divisional and departmental administrative services, which are allocated to direct cost objectives (including federal awards) based on negotiated formulas commonly referred to as facilities and administrative cost rates. Facilities and administrative costs allocated to such awards for the year ended June 30, 2010, were based on predetermined fixed rates negotiated with the University's cognizant federal agencies.

NOTE 3 - FEDERAL PERKINS LOAN PROGRAM (CFDA NUMBER 84.038)

The Federal Perkins Loan Program is administered directly by the University and balances and transactions relating to the program are included in the University's financial statements. The balance of loans outstanding under the Federal Perkins Loan program was \$19,529,359 as of June 30, 2010.

NOTE 4 - MATCHING

Under the FWS program, the University matched \$491,799 in total compensation for the year ended June 30, 2010, in addition to the federal share of expenditures in the accompanying schedule of expenditures of federal awards.

Under the FSEOG program, the University matched \$484,018 in funds awarded to students for the year ended June 30, 2010, in addition to the federal share of expenditures in the accompanying schedule of expenditures of federal awards.

**REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING
AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF
FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH
GOVERNMENT AUDITING STANDARDS**

The Board of Trustees
University of South Carolina
Columbia, South Carolina

We have audited the financial statements of the business-type activities and the discretely presented component unit of the University of South Carolina (the University) a department of the State of South, as of and for the year ended June 30, 2010, which collectively comprise the University's basic financial statements, and have issued our report thereon dated October 15, 2010. Other auditors audited the financial statements of the University of South Carolina School of Medicine Educational Trust and Clinical Faculty Practice Plan (the Trust); University of South Carolina Research Foundation; the University of South Carolina Educational Foundation; the University of South Carolina Business Partnership Foundation; the Greater University of South Carolina Alumni Association; the Carolina Piedmont Foundation; and the Educational Foundation of the University of South Carolina - Lancaster, (collectively referred to as Foundations), as described in our report on the University's financial statements. The financial statements of the Trust and the Foundations were not audited in accordance with *Government Auditing Standards*. Except as discussed in the preceding sentence, we conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the University's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the University's internal control over financial reporting.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the University's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We consider the 2010-1 deficiency described in the accompanying schedule of findings and questioned costs to be a material weakness.

A *significant deficiency* is a deficiency or a combination of deficiencies in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance. We consider the 2010-2 deficiency described in the accompanying schedule of findings and questioned costs to be a significant deficiency.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the University's internal control. We consider the 2010-3 and 2010-4 deficiencies described in the accompanying schedule of findings and questioned costs to be material weaknesses.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the University's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

This report is intended solely for the information and use of management, the Board of Trustees, the Office of the State Auditor of South Carolina and federal granting agencies and is not intended to be and should not be used by anyone other than those specified parties.

**INDEPENDENT AUDITORS' REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE
TO EACH MAJOR PROGRAM AND INTERNAL CONTROL OVER COMPLIANCE
IN ACCORDANCE WITH OMB CIRCULAR A-133
AND ON THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS**

The Board of Trustees
University of South Carolina
Columbia, South Carolina

Compliance

We have audited the compliance of the University of South Carolina (the University) with the types of compliance requirements described in the U. S. Office of Management and Budget (OMB) Circular A-133, *Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2010. The University's major federal programs are identified in the summary of auditors' results section of the accompanying Schedule of Findings. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the University's management. Our responsibility is to express an opinion on the University's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the University's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the University's compliance with those requirements.

As described in items 2010-3 and 2010-4 in the accompanying Schedule of Findings and Questioned Costs, the University did not comply with requirements related to Section 1605 of the American Recovery and Reinvestment Act of 2009 (ARRA) and the A-133 Compliance Supplement related to the Davis-Bacon Act.

In our opinion, except for the noncompliance noted in the preceding paragraph, the University complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2010.

Internal Control Over Compliance

The management of the University is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing our audit, we considered the University's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance but, not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the University's internal control over compliance.

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above.

Schedule of Expenditures of Federal Awards

We have audited the basic financial statements of the business-type activities and the discretely presented component unit of the University of South Carolina, a department of the State of South Carolina, as of and for the year ended June 30, 2010, and have issued our report thereon dated October 15, 2010 which included a reference to the reports of other auditors. Our audit was performed for the purpose of forming an opinion on the basic financial statements taken as a whole. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by OMB Circular A-133 and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

This report is intended solely for the information and use of management, the Board of Trustees, the Office of the State Auditor of South Carolina, and federal granting agencies and is not intended to be and should not be used by anyone other than those specified parties.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

**II. Findings Relating to the Basic Financial Statements Reported in
Accordance with Government Auditing Standards:**

2010-1 - Parking Facilities

Condition: During fiscal year 2008, the University entered into an agreement to construct, operate and manage two parking facilities. In fiscal year 2010, the University determined that based on the terms of the agreement, the facilities met certain criteria to be capitalized as University capital assets under generally accepted accounting principles (GAAP). The cost of the facilities had not previously been capitalized by the University. The University reported this determination to its independent auditors and proposed an adjustment of \$9,788,231 to restate prior year net assets. As indicated by generally accepted auditing standards, this restatement should be reported as a material weakness.

Recommendation: The University should continue to effectively evaluate complex transactions in order to determine proper reporting treatment in accordance with GAAP. Such evaluations should be completed within a timeframe that will prevent future restatements.

Management's Response: The University of South Carolina administration acknowledges the independent auditor's Findings Relating to the Basic Financial Statements Reported in Accordance with Government Auditing Standards included in the required independent audit reports. We appreciate the independent auditor's recognition that both of the reported conditions were identified by the administration; however, the timing of the solutions brought forward by our staff and the required restatements that arose from these conditions are important to us. The circumstances regarding both findings have been addressed with management personnel changes and renewed focus on internal controls over financial transactions and financial reporting. We believe our control environment and systems of internal control are improved as a result of this audit. We are confident that the current year accounting and the required restatements of prior year balances caused the transactions to be properly reported in our financial statements, and we recognize the significance of the independent auditor's unqualified opinion attesting to the fairness of our presentation.

2010-2 - Insurance Demutualization

Condition: Beginning in 2001, the University's personnel department began receiving shares of stock and dividend checks resulting from the demutualization of an insurance company that provided certain employee benefits to the University. For the period from 2001 until 2010, these items were maintained in a safe in the personnel department, including the dividend checks which were not deposited to the bank. Consequently, the value of the stock and the cash from the dividends were not recorded in the University's general ledger during this period. These conditions surfaced during 2010 as the result of an audit of the personnel department conducted by the University's internal auditor. In 2010, the University's internal auditor reported these conditions to Administration and the Board of Trustees.

II. Findings Relating to the Basic Financial Statements Reported in Accordance with Government Auditing Standards, (continued):

2010-2 - Insurance Demutualization, (continued)

Recommendation: In the event that an individual or department receives any form of consideration including (but not limited to) cash, checks, stock certificates, ownership interest, or donations of goods, services, or real property, on behalf of the University, these transactions should immediately be communicated to the University's controller. In addition, all documentation related to these transactions should immediately be forwarded to the controller's office for evaluation to determine proper accounting treatment and timely reporting in the University's financial statements. Such documentation and communication should also include (but not be limited to) vendor invoices, bank statements, investment statements, insurance policies and statements, and any written or verbal agreements which commit any type of University resources, whether presently or in the future.

Management's Response: Please see response above.

III. Findings and Questioned Costs Relating to Federal Awards

2010-3 - Failure to Demonstrate Compliance with Davis-Bacon Act

Criteria: Per the A-133 Compliance Supplement, the Davis-Bacon Act requires that the grantee obtains from the contractor, for each week in which any contract work is performed, a copy of the payroll register and a written certification to demonstrate compliance with prevailing wage rates.

Condition: We found six instances where the University was unable to provide payroll registers and certifications to demonstrate compliance with the provisions of the Act. The expenses from these findings totaled over \$3.6 million.

Context: We made ten selections for program 84.394: State Fiscal Stabilization Fund and the R&D Cluster. Out of these ten selections, four were exempt from Davis-Bacon because they were related to architectural fees or internal charges. The remaining six were exceptions to the requirements as described in the criteria above.

Cause: The Facilities Department did not obtain the documents required from the Contractor. In addition, the Office of Contract and Grant Accounting did not have the procedures in place to follow-up and ensure required documentation was requested and maintained.

Effect: The University did not maintain the payroll registers and certifications required by the Davis-Bacon Act and; therefore, could not demonstrate compliance.

Recommendation: We recommend that the University implement a process to ensure Facilities obtains and maintains proper paperwork to comply with the provisions of the Davis-Bacon Act.

Management's Response: The University of South Carolina administration acknowledges the independent auditor's findings related to the Federal Awards. The compliance with federal regulations is very important to us. We will obtain and verify the required documentation from the contractors. The circumstances that led to the lack of documentation have been addressed through improved notification procedures, added training of staff, and routine follow-up regarding compliance with federal regulations.

III. Findings and Questioned Costs Relating to Federal Awards, (continued)

2010-4 - Failure to Demonstrate Compliance with Section 1605: Buy American

Criteria: Section 1605 of the ARRA prohibits the use of ARRA funds for a project for the construction, alteration, maintenance, or repair of a public building or work unless all of the iron, steel, and manufactured goods used in the project are produced in the United States.

Condition: We found one instance where the University was unable to provide documentation to demonstrate compliance with the provisions of Section 1605. The expenses from this finding totaled \$18,000.

Context: We made five selections for program 84.394: State Fiscal Stabilization Fund. Out of these five selections, four were exempt from Section 1605 because they were related to architectural fees or internal charges. The remaining one was an exception to the requirements as described in the criteria above.

Cause: The Facilities Department did not obtain the documents required from the Contractor. In addition, the Office of Contract and Grant Accounting did not have the procedures in place to follow-up and ensure required documentation was requested and maintained.

Effect: The University did not maintain adequate documentation related to Section 1605 and; therefore, could not demonstrate compliance.

Recommendation: We recommend that the University implement a process to ensure Facilities obtains and maintains proper paperwork to comply with the provisions of Section 1605.

Management's Response: The University of South Carolina administration acknowledges the independent auditor's findings related to the Federal Awards. The compliance with federal regulations is very important to us. We will obtain and verify the required documentation from the contractors. The circumstances that led to the lack of documentation have been addressed through improved notification procedures, added training of staff, and routine follow-up regarding compliance with federal regulations.
