TAKE CARE OF THE ENVIRONMENT WHILE TAKING CARE OF YOUR CAR.

Proper maintenance not only helps your car last longer, it also can help maintain a healthy environment. Follow the tips below to improve your car's performance and protect our land, air and water.

-  **Recycle your used motor oil.** It's the law in South Carolina. Keep it out of our lakes and streams.
-  **Replace oil and air filters frequently.** It will keep our air cleaner. Remember, oil bottles and oil filters are recyclable.
-  **Check the air pressure in your tires.** Under-inflated tires cause wear and reduce your gas mileage.
-  **Rotate your car's tires regularly.** This will extend the life of your tires.
-  **Turn off your car's engine when parked.** This will reduce ground-level ozone emissions and save gasoline.
-  **Refuel your car in the evening.** This helps reduce ground-level ozone.
