# PUBLIC TRANSIT DATA REPORT – BACKGROUND

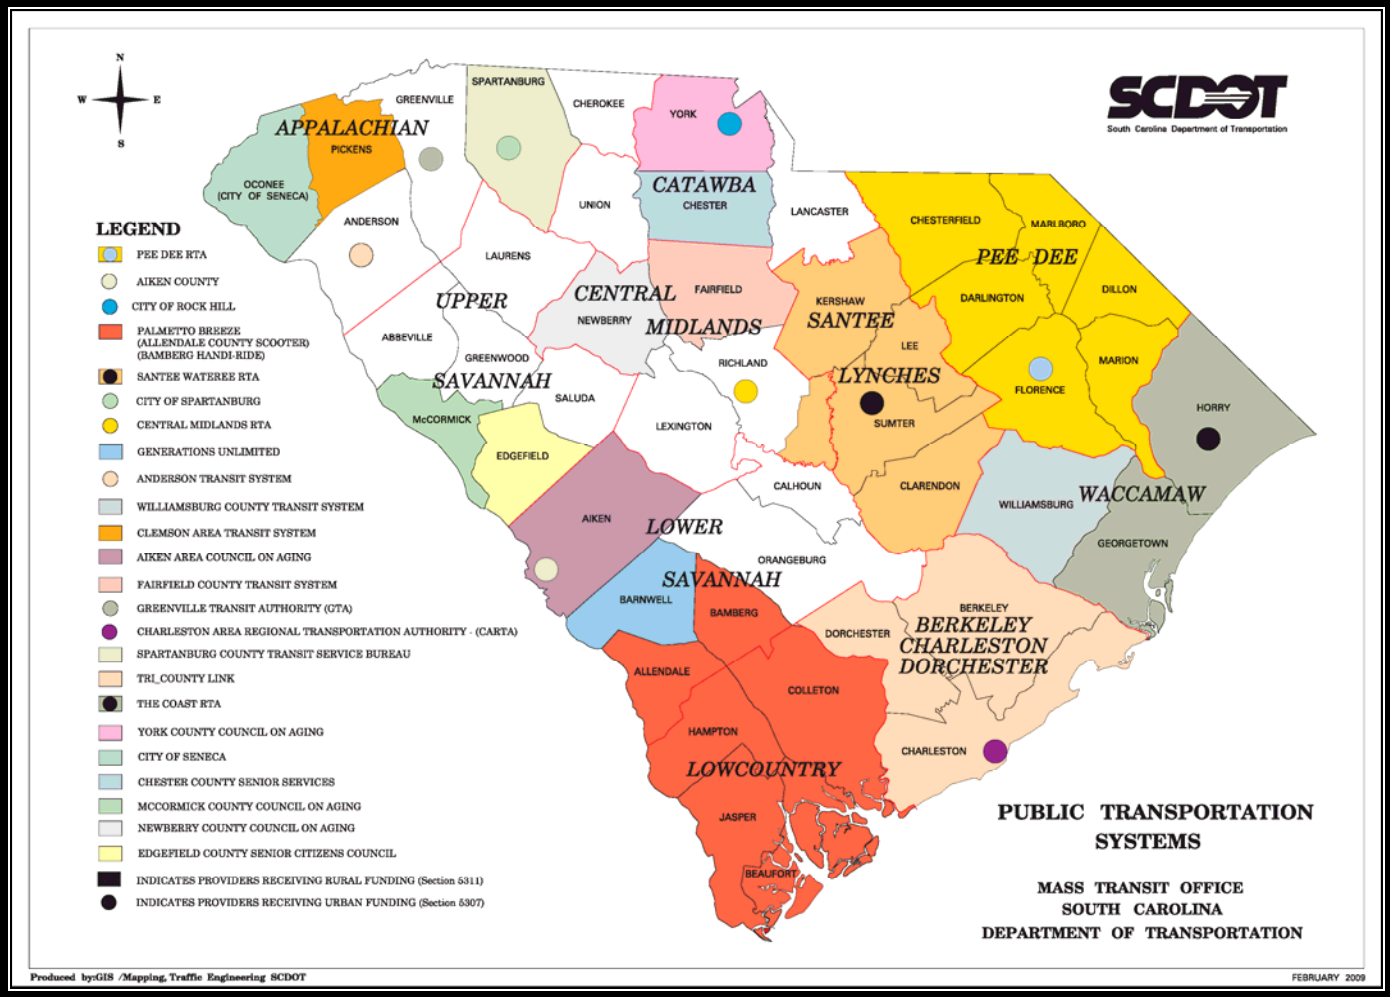

## SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION

### FISCAL YEAR 2007-2008

Public transit service meets a variety of needs in South Carolina, including those of commuting workers, students, shoppers and medical patients. At least one transit agency operates in each of the ten planning regions in the state. Commuter transit service has been used in some communities to address high unemployment and the lack local job opportunities. The rural characteristics of many South Carolina communities make the provision of transit service more of a challenge as compared to urban communities where there are generally higher population densities. Transit services have been implemented in some communities through existing human service agencies that have agreed to provide general public transportation in addition to their regular human service activities.

The map below identifies current transit systems in South Carolina by the county of location and by planning region. There are 25 transit service operations operated by 24 separated transit agencies. Santee Wateree RTA provides general public transit services for two distinct service areas, and reports the two activities as separate entities.

### SERVICE AREAS FOR GENERAL PUBLIC TRANSIT SYSTEMS IN SOUTH CAROLINA

**PUBLIC TRANSIT DATA REPORT – BACKGROUND**  
**SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION**  
**FISCAL YEAR 2007-2008**

**APPALACHIAN PLANNING REGION**

The Appalachian Planning Region consists of Anderson, Cherokee, Greenville, Oconee, Pickens and Spartanburg counties. The region has six transit operations that provide general public transit services. They are the City of Anderson Transit System, Greenville Transit Authority, the City of Seneca Transit System, Clemson Area Transit, the City of Spartanburg Transit System and Spartanburg County Transit System. The City of Seneca is a new transit service provider that began offering fixed route services to the residents in Seneca during Fiscal Year 2006-2007. Greenville County has the largest population of any county in the state and the industrial development in and around the Greenville Urbanized Area could represent opportunities for commuter transit development. A unique operation in the Appalachian planning region is the Spartanburg County Government transit system, operated by the Spartanburg Regional Hospital System that provides demand response transit service in the urbanized area and general public service for the rural parts of the County as well.

**BERKELEY-CHARLESTON-DORCHESTER PLANNING REGION**

The Berkeley-Charleston-Dorchester Planning Region contains the counties that identify its name (Berkeley, Charleston and Dorchester counties). There are two general public transit systems that operate in the B-C-D region, Charleston Area Transportation Authority (CARTA) and the Tri-County Link (formerly known as the Berkeley-Charleston-Dorchester RTMA). CARTA operates in the urbanized areas of Charleston County, while the Tri-County Link provides services to the rural communities within the three-county region.

**CATAWBA PLANNING REGION**

The Catawba Planning region is made up of the counties of Chester, Lancaster, Union and York counties. The Catawba planning region abuts the North Carolina border on its northeast section and is impacted in terms of commuter traffic into the Charlotte metropolitan area. There are three general public transit systems operating in the region; the City of Rock Hill transit service, the Senior Services Incorporated of Chester County, which operates a new public transit service called the “Chester County Connector” and the York County Government transportation services.

**CENTRAL MIDLANDS PLANNING REGION**

The Central Midlands planning region consists of Fairfield, Lexington, Newberry, and Richland counties. This region includes the city of Columbia, the state capital; and Richland County which is the second largest county in terms of population. Three general public transit systems operate in the Central Midlands regions: the Central Midlands RTA operates in Columbia area; the Fairfield County Transit System in Winnsboro and the Newberry County Council on Aging.

**PUBLIC TRANSIT DATA REPORT – BACKGROUND  
SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION  
FISCAL YEAR 2007-2008**

**LOWCOUNTRY PLANNING REGION**

The Lowcountry Planning Region is made up of Beaufort, Colleton, Hampton and Jasper counties. The Palmetto Breeze RTA (formerly the Lowcountry RTA) is the only general public transit entity operating in the region. Having proximity to the popular Hilton Head tourist destination, the Palmetto Breeze provides work-related commuter trips from rural communities in the region to employment destinations at Hilton Head Island, as well as demand response and contract transit services. Except for Beaufort County, the counties of the Lowcountry planning region are primarily rural.

**LOWER SAVANNAH PLANNING REGION**

The Lower Savannah planning region contains Aiken, Allendale, Bamberg, Barnwell, Calhoun and Orangeburg counties. The general public transit entities in this region are the Aiken Area COA, the Lower Savannah Regional Transit Management Association (Lower Savannah RTMA) and Generations Unlimited. The Lower Savannah RTMA manages the urbanized transit services in Aiken County and functions as transportation management organization for the Lower Savannah planning region. Through its transportation management functions, the Lower Savannah RTMA also manages demand responses provider by another transit agency in Allendale and Bamberg counties. The following general public service activities are found in the Lower Savannah region:

<b>GENERAL PUBLIC SERVICES IN THE LOWER SAVANNAH PLANNING REGION</b>				
<b>SERVICE NAME</b>	<b>TYPE SERVICE</b>	<b>MANAGING AGENCY</b>	<b>SERVICE PROVIDER</b>	<b>SERVICE AREA</b>
Aiken Area COA	Demand Response	Aiken Area COA	Aiken Area COA	Aiken County
Aiken County Transit	Fixed Route & DR	LS RTMA	Aiken Area COA	Urban Aiken County
Allendale Scooter	Demand Response	LS RTMA	Palmetto Breeze	Allendale County
Bamberg HandiRide	Demand Response	LS RTMA	Palmetto Breeze	Bamberg County
Generations Unlimited	Demand Response	Generation Unlimited	Generation Unlimited	Barnwell County

Source: SCDOT Mass Transit & Planning Offices

Three of the services listed in the table show the Lower Savannah RTMA as the managing agency. The service agreement Lower Savannah RTMA established with the Palmetto Breeze RTA has made general public transit service available to residents of Allendale and Bamberg counties.

**PEE DEE PLANNING REGION**

The Pee Dee planning region is comprised of Chesterfield, Darlington, Dillon, Florence, Marion and Marlboro counties. The Pee Dee RTA is the only general public transit provider in the region and provides general public service to all six counties. The counties of the Pee Dee planning region reflect a collection of some of the highest unemployment rates in the state. The

**PUBLIC TRANSIT DATA REPORT – BACKGROUND**  
**SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION**  
**FISCAL YEAR 2007-2008**

Pee Dee RTA currently provides commuter trips to the Myrtle Beach area for residents who are employed or seeking employment in the Grand Strand region.

**SANTEE LYNCHES PLANNING REGION**

The Santee Lynchess planning region has Clarendon, Kershaw, Lee and Sumter counties. The Santee Wateree RTA is the only general public transit system in the planning region. The Santee Lynchess planning region includes the Shaw Air Force Base military installation and the City of Sumter. According to 2000 Census data, Sumter County is 62.1% urban, while the other three counties in the region are over fifty percent rural. Lee and Sumter counties have unemployment rates that were both higher than the state annual average of 6.8% for the year 2005. Offering an option for employment outside of the region, the Santee Wateree RTA has regular commuter trips to the Myrtle Beach area.

**UPPER SAVANNAH PLANNING REGION**

The Upper Savannah planning region contains the counties of Abbeville, Edgefield, Greenwood, Laurens, McCormick and Saluda. Currently operating general public transit services in the Upper Savannah region are the Edgefield County Senior Citizen Council (ECSSC) and the McCormick County Senior Center. The McCormick County Senior Center is a new transit start up that began during Fiscal Year 2006-2007. Both of these agencies are primarily human service entities, offering programmatic services to senior citizen clients. Transportation is generally a key component with the successful operation of many human service agencies. The provision of general public transit service is open to all residents in the respective service areas of both the ECSSC and the McCormick County Senior Center.

**WACCAMAW REGIONAL PLANNING REGION**

The Waccamaw Regional planning region has Georgetown, Horry and Williamsburg counties, with two general public transit providers operating in the region (the Coast RTA and the Williamsburg County Transit System). This planning region includes the tourist and service employment centers of the Grand Strand and Myrtle Beach area. Four of the general public transit systems make regular commuter destination trips into the Grand Strand area of the Waccamaw Regional planning region. With development expected to continue in this region, the need for additional service-related employment would also increase the need for transporting more commuters to the region to fill new positions.

**PUBLIC TRANSIT DATA REPORT – BACKGROUND**  
**SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION**  
**FISCAL YEAR 2007-2008**

**STATEWIDE ISSUES**

Most of the 46 counties in South Carolina have some level of general public transit services. The counties listed below have been identified as not having general public transit service.

<b>COUNTIES WITHOUT GENERAL PUBLIC TRANSIT SERVICES</b>						
<b>SELECTED DEMOGRAPHIC FACTORS</b>						
	<b>COUNTY</b>	<b>Population</b>	<b>Over 65</b>	<b>% Rural<sup>1</sup></b>	<b>% In Poverty</b>	<b>2005 Unemployment</b>

Source: SCDOT Mass Transit Office, South Carolina Statistical Abstract

<sup>1</sup>Rural definition is Census-derived and excludes Urbanized Area definition.

While the indicators given in the preceding table are not an exhaustive list of transit-related factors, they are often associated with the evaluation of transit needs. Using the state average as a benchmark of comparison, nearly all of the counties surpass the state level in population over 65 years of age, percent rural communities, percent of county population in poverty and annual average unemployment level. Except for Greenwood County, all of the counties identified as not having general public transit service have more than fifty percent of their population living in rural communities. Rural communities present a particular challenge to the planning of transit services because of the relatively lower population density as compared to typical urban areas and fewer facilities that can serve as idea bus stops for rural passengers.

Feasibility is a major factor in the consideration to implement transit services in a particular community. The identification of an existing agency partner, such as a human service agency, could help to make new general public transit start ups more practical for communities that have demonstrated the need for such service. Three of the four new general public start-up operations have been human services agencies (specifically senior-related human services agencies) that accepted general public transit service as an additional function.

Some of the counties that have comparatively high unemployment rates may benefit from employment-based commuter transit activities. The combining of commuter services with other demonstrated transit needs, such as senior transportation and local general public services, may represent a more feasible proposal for new transit services with the communities that currently have no service.

**PUBLIC TRANSIT DATA REPORT – BACKGROUND**  
**SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION**  
**FISCAL YEAR 2007-2008**

As of June 30, 2008, South Carolina had 24 public transit agencies operating in 25 areas of the State. Of these, 7 are exclusively urbanized, 14 are rural or non-urbanized, and 4 offer both urbanized and rural services. The state’s public transit operations presented in this report are listed in the following table.

**PUBLIC TRANSIT DATA REPORT – BACKGROUND**  
**SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION**  
**FISCAL YEAR 2007-2008**

A common issue affecting transit service in the state is the rural nature of many of the communities in South Carolina. While rural community characteristics do not preclude the establishment of transit service, it can present a challenge for service effectiveness.

Another common issue affecting transit service statewide is the exposure and perception of transit services in some communities. According to the United States Census figures, less than 1.0% of South Carolina workers use public transportation as a means of getting to and from their work sites. At the same time, 79.9% of the state's workers drive to work alone in some type of motor vehicle. Transit is obviously not viewed as a practical or personal option for many of the state's workers. However, there are some efforts that seek to counter this. Examples include the ongoing SmartRide commuter-focused transit services and the Sumter Vanpool in the greater Columbia and Sumter areas, and the CARTA Express and Tri-County Link Commuter Solutions in the greater Charleston region. There are multiple examples of rural express and vanpool options throughout the state, collectively increasing the number of modal choices for South Carolinians.

Beginning with Fiscal Year 2007-2008 (July 1 – June 30), SCDOT's Office of Planning developed and implemented a new transit data acquisition and analysis program called OPSTATS (Operating Statistics). The purpose of the OPSTATS program is to better assist SCDOT and the state's public transit providers in gathering and analyzing data for assessing operating and capital needs, conducting annual trend analyses, monitoring performance, and ongoing reporting to local, state and federal entities. This report represents the results of OPSTATS' initial data analyses based on submissions from transit operators statewide.

The report is divided into three sections: statewide summary, statewide performance, and provider summaries, inclusive of provider performance based on reported data. ***It is important to note that the data presented herein is as provided by the state's public transit operators without modification.*** The following key is to be used as a reference to the Statewide Summary and Performance charts:

- ◆ AIKEN – Aiken Area Council on Aging, Inc.
- ◆ BFE – Best Friend Express/Lower Savannah RTMA
- ◆ CMRTA – Central Midlands Regional Transit Authority
- ◆ CARTA – Charleston Area Regional Transit Authority
