

SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION
Qualified Product Policy for
Qualified Product List 21

Preformed Pavement Markings, Flexible Retroreflective (White and Yellow)

Only materials from sources appearing on the Department's Qualified Product Listing 21, titled "Preformed Pavement Markings, Flexible Retroreflective (White and Yellow)" may be used to supply SCDOT work. A manufacturer may request qualification by furnishing the following information to the Office of Materials and Research contact listed below in order to verify that the marking meets the requirements of the specification titled "Preformed Flexible Retroreflective Pavement Markings (White and Yellow)" dated September 1, 1992.

1. Appropriate information and test results to verify that the product to be considered has been successfully tested for two years by the National Transportation Product Evaluation Program (NTPEP) and that the product is the same as that tested.
2. A certified affidavit with test results from a recognized laboratory verifying the material meets the requirements of the specification.
3. Complete instruction for installing the material.
4. Complete identification of each type of material along with the brand name and stock numbers to be used when purchasing.
5. A technical data sheet.
6. A Materials Safety Data Sheet conforming to applicable OSHA regulations.
7. A notarized letter for each product to be qualified stating that the product (by name) meets all SCDOT specifications and that the manufacturer agrees to comply by the warranty terms of Section X of the specification for all materials furnished.
8. A letter or statement regarding pavement bonding that includes specific recommendations on how soon the markings may be applied after pavement placement, time necessary for adhesives to cure before rain, and other factors that would affect the bonding when markings are otherwise properly installed.
