QUALIFIED PRODUCT POLICY
FOR
RAPID PATCH MATERIAL FOR CONCRETE PAVEMENT

Requests to qualify a material should be submitted to:

Aly Hussein, PhD, P.E.
Structural Materials Engineer
Office of Materials and Research
SCDOT
PO Box 191
Columbia, SC 29202
(803) 737-6687
Fax: (803) 737-6649
Email: husseinaa@scdot.org

General:

This material is intended for use in partial and full depth spalls in concrete pavements as directed by the Department's Engineer.

Material:

Rapid patch material shall be a quick set portland cement based "brand name" patching material meeting or exceeding the requirements of ASTM C 928 that will gain at least 2000 psi without requiring that the road be closed overnight when patching is performed during the AM hours of the day.

To Qualify a Brand Approval:

Brands of materials will be considered for placing on the qualified product list by the manufacturer making the product known and furnishing appropriate information verifying the product's compliance with the SCDOT requirements as well as application instructions **and that the material will be used in SCDOT work.**

After the material is qualified and when shipments are made, the manufacturer shall furnish a certification with each order stating that the product furnished meets the Department's specifications for Rapid Patch Material. Once a material is qualified, the material will be added to Qualified Product List 22.
