

QUALIFIED PRODUCTS POLICY FOR SEDIMENT TUBES
QUALIFIED PRODUCTS LIST 57

This policy covers sediment tubes proposed for use as temporary sediment control best management practices (BMPs). When certified affidavits and test results from a qualified independent laboratory show a particular sediment tube meets the SCDOT criteria, that particular product will be listed on Qualified Products List 57. Affidavits and test results shall be required every two years. Only the products that appear on Qualified Products List 57 published by the SCDOT Office of Materials and Research, entitled "Qualified Sediment Tubes" or otherwise accepted by the Engineer shall be used.

Performance Requirements for Sediment Tubes for Ditch Checks

Refer to the Sediment Tubes Specifications for sediment tube material and performance requirements.

Requests for qualification should be submitted to:

G. Michael Lockman
Geotechnical Materials Engineer
SCDOT Office of Materials and Research
PO Box 191
Columbia, SC 29202
