

2004 RESULTS OF THE ADVANCED PLACEMENT (AP) EXAMINATIONS AND THE INTERNATIONAL BACCALAUREATE (IB) EXAMINATIONS

Advanced Placement Results

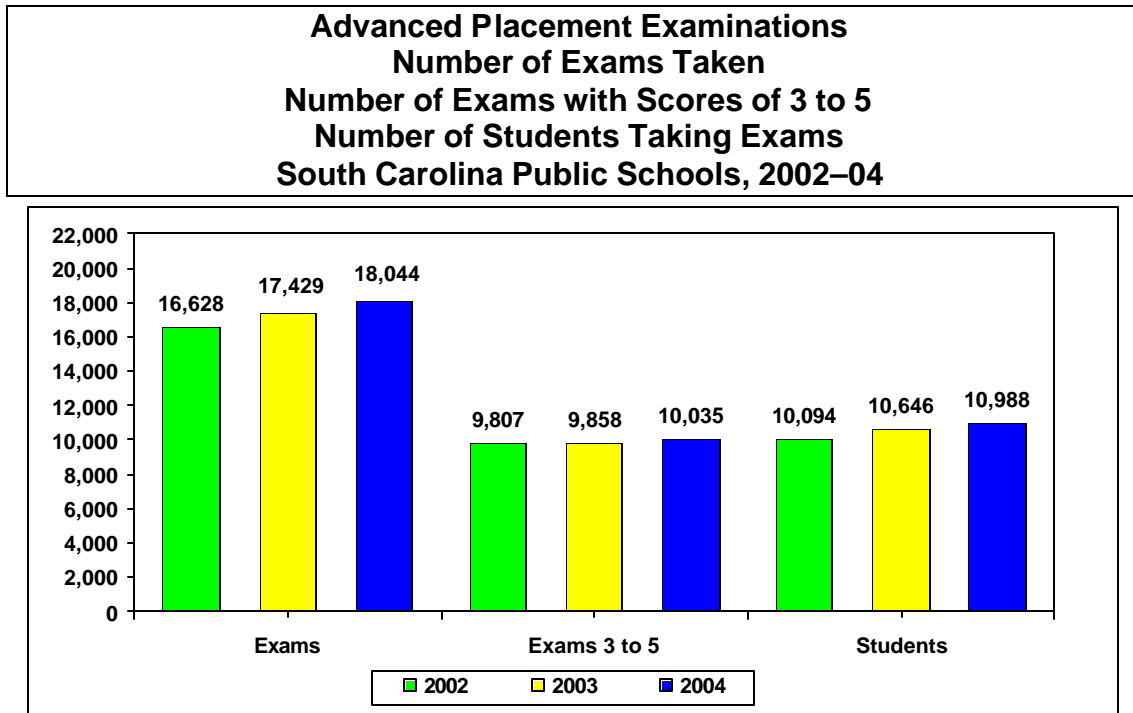

Since 1984, each school district in South Carolina has been required to provide Advanced Placement (AP) courses in all secondary schools that include grades 11 or 12. These classes prepare students for the national AP examinations. Students who score 3, 4, or 5 on an AP exam are generally considered qualified to receive credit for the equivalent course(s) at colleges and universities that give credit for AP exams. The data are presented for high school students who participated in AP courses in public schools and took at least one AP exam during the 2003–04 school year.

The percentage of examinations with scores of 3 or higher for South Carolina public school students in 2004 was 56 percent (10,035* out of 18,044*). For the nation, during the same period, the percentage of examinations with scores of 3 or higher for public school students was 60 percent, the same as the previous year. The number of exams taken in South Carolina public schools rose from 17,429 in 2003 to 18,044 in 2004, an increase of 4 percent, and the number of test-takers rose from 10,646 in 2003 to 10,988* in 2004, an increase of 3 percent.

*These data were provided by the College Board on August 23, 2004. This report does not reflect any changes the College Board may have made after August 23, 2004.

The chart below provides information on the number of AP exams taken, the number of exams with scores of 3 to 5, and the number of public school students taking exams in South Carolina public schools during the past three years.

In 2004, 10,988 South Carolina public school students took 18,044 exams in 34 of 34 AP exam areas (students could take more than one test). The five most-taken AP exams were, in order, United States History, English Literature and Composition, Calculus AB, English Language and Composition, and Biology. Least-taken exams included Comparative Government, French Literature, and Latin Literature.

In 2004, 52 percent of exams taken by female public school students received scores of 3 to 5; 60 percent of exams taken by male public school students received scores of 3 to 5; 29 percent of exams taken by African-American public school students received scores of 3 to 5; and 59 percent of exams taken by white public school students received scores of 3 to 5.

The table below provides information in alphabetical order on the AP exams taken by South Carolina public school students in 2004, the numbers of 3 to 5 scores, and the percentages of 3 to 5 scores. The College Board does not provide score data on groups including fewer than fifteen test-takers.

Below are tables providing information on AP exam results by school in alphabetical order. Because the College Board does not provide score data for fewer than fifteen test-takers, district numbers cannot be calculated. No performance data are provided by the State Department of Education for subgroups smaller than five in the scores category.

International Baccalaureate Results

The International Baccalaureate Organization (IBO), founded in 1968, is a nonprofit educational foundation based in Geneva, Switzerland. It is a comprehensive two-year curriculum, available in English, French, and Spanish, that generally allows students to fulfill requirements of various national education systems.

IBO's Diploma Program is a high school program offered to students in the final two years of school and requires that a candidate take one subject from each of the following six groups: (1) the "Language A1" group is the student's first language and includes the study of selections from world literature; (2) the "Second Language" group is a language and literature course in a language other than the student's first language; (3) the "Individuals and Societies" group includes courses such as geography, history, psychology, anthropology, and business and management; (4) the "Experimental Sciences" group includes biology, chemistry, physics, environmental systems, and design technology; (5) the "Mathematics and Computer Science" group includes four math options related to the candidate's anticipated need for math beyond high school (for example, a math course intended for students who will take higher-level math in college related to subjects such as physics or engineering); (6) the "Arts and Electives" group includes visual arts and music and theater arts, as well as Latin and classical Greek, along with the option of a second subject from groups 1–4 or a further course in mathematics.

Each test in the subject groups is graded on a scale of 1–7. Below is a table displaying, by school, the 2004 results available from IBO on August 17, 2004, for South Carolina public school students taking IB subject area tests and receiving a score of 4 or higher (4=satisfactory performance; 5=good; 6=very good; 7=excellent).

High School	Number Taking at Least One IB Subject Area Test	Number of IB Subject Area Tests Taken	Number of Tests with Scores of 4 or Higher	Percent of Tests with Scores of 4 or Higher
A.C. Flora	91	278	200	72%
Aiken	30	77	63	82%

High School	Number Taking at Least One IB Subject Area Test	Number of IB Subject Area Tests Taken	Number of Tests with Scores of 4 or Higher	Percent of Tests with Scores of 4 or Higher
Southside	56	183	128	70%
Sumter	56	146	117	80%
Wilson	45	122	104	85%
Woodmont	32	33	6	18%

Below is a table displaying, by school, the number of South Carolina public school students who were 2004 candidates for diplomas (students in the second year of the two-year IB program can register as Diploma Candidates when testing), the number who were awarded diplomas, and the percentage of diplomas awarded. Where fewer than five diplomas were awarded, no results are given (--). (IBO reported “No Data” for Battery Creek High School regarding diplomas attempted or awarded.)

High School	Diploma Attempted	Diploma Awarded	Percentage
