

What can the Census do?

Give South Carolina students a brighter future.

Programs like those offered at the Aiken County Career and Technology Center give students the chance at a bright future in the beauty profession.

Census data is used to fund career education programs in each state – programs like the one these students are counting on. So when your census form comes this spring, just fill out the ten questions and send it back. It will only take ten minutes.

*The 2010 Census is coming
to South Carolina.
Make sure we count!*
