In the first six months of the project's third year, both the quantitative and qualitative assessments of the three targeted areas (Greenville, Florence, and Allendale) have been completed. On site meetings have been held with these three sites to assess and identify technical assistance and evaluation needs. Currently, this project is providing evaluation support to three DMC projects that are currently being funded through SCDPSOJP. This project in consultation with each local project has identified specific baseline data needs and identified a strategy to retrieve this information. The Institute for Families in Society is working on a grant application that may provide funding opportunities to the Allendale community. Additional quantitative analysis is currently being planned using other datasets that will be provided by the Budget and Control Board.
