The students experience an outdoor field investigation where they use science and math to explore the environment first hand. We'll get to join in as two education specialists with Barrier Island Eco Tours allow Clay Hill students to see, taste and touch as they learn about the wetlands and creatures in the marsh and sea! Plan to join us for this special program that is a perfect way to learn and lead us into summer!

## Kids in the Courtroom

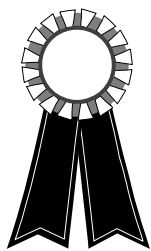

Repeats April 2 and 9, 8:20–8:57 a.m. IMC Also access online in *StreamlineSC*  
(Unlimited rights)

Each year the **Lexington Police Department** of Lexington, SC pairs children and teens with actual court personnel to participate in a courtroom trial. Called **Kids in the Courtroom**, this event has become so popular that participants wanting to be involved are often put on a waiting list! Each trial has a fairy tale character accused of a crime. For our production of **Kids in the Courtroom**, which allows us to share the components of a courtroom experience with students across the state, our main character "Cinderella" is accused of shoplifting slippers.

**Kids in the Courtroom** is designed for upper elementary, middle and high students. The program helps students learn about law and order as both the crime investigation, including an interrogation, and the courtroom proceedings are shown as if actually occurring. Real life police officers investigate and testify. Legal terms and job duties of courtroom personnel are explained throughout the courtroom trial.

So...did Cinderella's Godmother provide her with the slippers or did Cinderella steal the slippers from the store? Sleeping Beauty, Goldilocks, Snow White, Prince Charming, and Little Red Riding Hood as well as Cinderella's stepmother and stepsisters all take the stand providing testimony to help jurors, ranging in ages from 8 to 16, decide if Cinderella is guilty or not guilty of the crime. Produced and directed by Pat Henry in partnership with the Lexington Police Department and Cindy Flack.

### **Program Titles for Nature Comes Back – 25 Years After Chernobyl:**

Program One – Pulling Back the Curtain (26:46)

Program Two – Reflecting on the Impact (26:46)

Program Three – Observing the Return of Life (26:46)

Twenty-six years ago on April 26, 1986, the largest nuclear disaster in history took place behind the Soviet Iron Curtain. eMedia, part of the SC Department of Education, worked with USC and ETV to produce these three programs that “pull back the curtain” with a special panel of experts, including naturalists, scientists, journalists, and historians, to allow students to learn about the effects Chernobyl had on the nature, nuclear science, US-Soviet relations, and the people who called it home.

Rare photos and video captured by ETV in partnership with USC take students across the world to an area that was devastated by an accident of catastrophic proportions, but, over time the people and nature have returned. Hosted by Mark Quinn, the outstanding participants in the series include:

- **Charles Bierbauer**, Dean of USC's College of Mass Communications and Information Studies, who was CNN's senior White House correspondent in 1986 at the time of the Chernobyl incident and reported on President Reagan's trip to Indonesia and Japan as Chernobyl's radiation cloud drifted across two continents.
- **Dr. Tim Mousseau**, USC Professor of Biological Sciences, who has made numerous trips to Chernobyl to study the impact of radioactive contaminants on the area and is a leading authority on the impact of radioactivity on birds and insects in the area surrounding Chernobyl.
- **Dr. Gordon B. Smith**, USC Professor of Political Science and Director of the Walker Institute of International and Area Studies, who is a noted authority on Russian politics and author of numerous books including “Soviet Politics: Struggling with Change” and “State-Building in Russia.”
- **Dr. Eduardo B. Farfan**, Principal Engineer in Environmental Studies and Biotechnology at Savannah River National Laboratory, who worked with the Chernobyl Center's International Radioecology Laboratory and lived in nearby Belarus for five years.
- **Sherry Beasley**, Grants Director and Foundations Coordinator for the Clemson University Provost, who made four trips to Chernobyl to chronicle and report on the activities in the area and wrote feature articles for *The State* and other media.
- **Allen Sharpe**, Director of Photography for ETV's **NatureScene**, whose photographs from his visit as part of the ETV crew that produced programs in Chernobyl and Kiev are used in the programs.
- **Rudy Mancke**, Naturalist-in-Residence at USC, who was the naturalist on ETV's series **NatureScene** that aired nationally on PBS for twenty-five years and who made four trips to Chernobyl to document the natural history.

“I think we had an incredible opportunity that most people couldn't have because we were able to take our camera to see what other people hadn't seen before,” **Rudy Mancke**, naturalist and host of **NatureScene**, said. “We had the support of the Ukrainian government and, I believe, our program on Chernobyl is the only thirty-minute program on the Natural History – looking at the plants and animals - of the event that has been done.” Featured in the programs are footage and photos from when **NatureScene** visited the site of the reactor in 2003 and then traveled to the nearby capital city of Kiev to look at human and natural history.

Chernobyl was evacuated and fenced in to keep people out. But since April 26, 1986, nature has shown its resiliency with the plants and animals returning to the deserted site. And, re-settlers have returned too. In Kiev about 60 miles away, the ETV crew got to see how plants with American “roots” were thriving while they looked at the history of the capital city and how it was also impacted by the reactor disaster.

This program exposes “the choking game” . . . a shockingly foolish and deadly activity among 9-14 year olds that has resulted in the tragic deaths of children across the country. Through interviews with children who have participated in the “game,” siblings and parents of children who have died, and experts and physicians, young viewers get the straight and alarming facts about just how dangerous this “game” is. Dr. Thomas Andrew, a medical examiner, describes what actually happens to the brain when blood flow gets cut off causing brain damage and possible death. A parent describes and details the tragic death of her son in an attempt to prevent others from the same fate. The program gives young viewers information explaining the difference between healthy and dangerous risk taking.

### KNOWITALL NOTES

Knowitall.org

Visit **A Natural State** on Knowitall.org. <http://www.kn>

**A Natural State** explores how people express a love for nature by shaping, twisting, carving, and weaving materials collected from the landscape. Some of the arts and crafts featured in **A Natural State** reveal the cultural heritage of our state, while others employ concepts from the world of modern art. What unifies the artists is their unique bond to the natural world - where a hike in the woods, a backyard picnic, or a walk in the park provides materials and inspiration for a work of art. By examining the materials, artwork, landscape, and artist, we learn how to create our own sense of place, a unique picture of how we shape the land and community as they shape us.

*The Featured Artists* section takes a look at "natural" artists across the five landforms of the state – the blue ridge, piedmont, sandhills, coastal plain, and coastal zone. Videos, text, and photographs explore the inspiration, materials and process behind their work, while providing "how-to" guides for students and teachers who would like to work within the artist's medium and form.

*The Students* section provides aspiring young artists with a virtual museum to display work that uses materials and inspiration from their "neck of the woods."

*The Folklife Resource Center* is a reference tool and online catalog developed in partnership with the McKissick Museum of the University of South Carolina. Many of the museum's videos, photographs and research documents related to the folk life and arts of South Carolina are available online through this growing collection of assets.

*The Teacher Resources* section provides lesson plans and standards correlations for the Arts, Language Arts, Science, and Social Studies curriculums.

## Nutrition 101: Nutrition Basics for K–12 Health Education FREE, Available online for SC Educators – 7.5 Contact Hours (10 pts.)

Whether you need a refresher in nutrition basics or have a limited background in nutrition education, these online modules and resources will provide an interactive review of carbohydrates, proteins, fats, vitamins, and minerals as well as current recommendations and guidelines for proper nutrition - great information that can be used in your health education classes and for yourself!

As an extra incentive to complete the course, SC Healthy Schools will provide a copy of *Comprehensive School Health Education: Totally Awesome Strategies for Teaching Health*, 7th Edition (Meeks, Heit and Page) to the first 150 teachers that complete the modules, pass the post-test and fill out the program evaluation. There is no charge to SC educators to take this course. Completers get a certificate certifying completion of 7.5 contact hours, which can count for 10 points. Please contact your district professional development coordinator to make sure you can use this course for credit.

These modules were funded through Cooperative Agreement with the Centers for Disease Control Prevention, Division of Adolescent and School Health U87DP001244-03 to the SC Department of Education. These modules are adapted from the Chronic Disease Series - Nutrition and Health developed by the Center of Excellence for Training and Research Translation (Center TRT). The Center TRT is based in the Center for Health Promotion and Disease Prevention at the University of North Carolina at Chapel Hill, one of 33 Prevention Research Centers supported by the Centers for Disease Control and Prevention. <http://www.center-trt.org/index.cfm>.

## **Pathways to Graduation (PTG) – March Program Repeats**

Repeats April 2, 1:00–2:00 p.m. IMC (Unlimited rights) Also online in *StreamlineSC*

The March **Pathways to Graduation (PTG)**, a program beneficial for all educators, repeats April 2. South Carolina's dropout rate has shown consistent improvement during the past three years and several collaborative initiatives have contributed to this success. This PTG edition will feature the 21st Century Community Learning Center program and we'll learn how many districts/schools are using this after-school initiative to help students remain in school and graduate with a high school diploma. Join Dr. John Lane, SCDE Education Association for At-Risk Student Initiative and the 21st CCLC Program, for this third PTG program for this school year. For information on content, contact Dr. John Lane at [jllane@ed.sc.gov](mailto:jllane@ed.sc.gov).

## **SC State Museum – Resources for Educators: Earth Day**

April 4, 2:00–3:00 p.m. IMC Also online in *StreamlineSC*

Repeats April 11, 2:00–3:00 p.m. IMC (Unlimited rights)

This special series is a partnership production of the SC State Museum, the SC Department of Education and ETV, which is designed to give South Carolina educators the opportunity to learn about what is available at the museum to support their classroom lessons. State Director of Education, Tom Falvey takes a look at environmental programs this month for Earth Day. Learn how your class can take a tour of the entire state with one visit to the State Museum. Natural History exhibit lessons and tours focus on ecosystems from the ocean to the mountains, including your own backyard. We'll also explore some environmental project ideas, partnerships and funding ideas for your classes and campus. A visit to Heathwood Hall Episcopal School in Columbia highlights some excellent GreenSteps projects and partnerships to fund and build native gardens that support native plant and animal populations and serve as education spaces. This program is great for all grades. For information, contact Tom at [tom\\_falvey@scmuseum.org](mailto:tom_falvey@scmuseum.org).

### **For Educators - Fairfax Network's Cultural Competence**

May 2, 1:00–2:00 p.m. IMC (Unlimited rights) Also online in *StreamlineSC*

NEW program for educators on tap May 2. With ever increasing cultural diversity in our schools, how do educators establish and maintain effective relationships with those whose experiences and beliefs differ from their own? Dr. Darryl Craig, program manager for Fairfax County Public Schools College Success program, presents her ideas and strategies for becoming "Culturally Competent," which she describes as the ability to interact effectively with people from different cultures. Dr. Craig will define and examine the importance of cultural competence, discussing how to use this important skill to help close the achievement gap and promote best practices that create success among diverse learners. ## Newsy Notes

- KUDOS to **R. Scot Hockman**, South Carolina Department of Education Office of Teacher Effectiveness and host of eMedia's **Articulation Live** series, for recently being named the **2012 Elizabeth O'Neill Verner Governor's Awards for the Arts**. Scot received the award in the Arts Education category. The Verner Award represents the highest honor the state presents in the arts. Established in 1972, the annual awards recognize outstanding achievement and contributions to the arts in South Carolina. Scot was an outstanding art educator in Lexington-Richland School District Five's Irmo Middle School for many years, during which time he was recognized as the 2003 Outstanding Middle Level Art Educator by the National Art Education Association. With SCDE Scot has worked extensively with ITV/eMedia and ETV for nearly seven years to produce exceptional programming for K–12 students and educators in fine arts. All of us in eMedia and ETV send a BIG congratulations and sincere THANK YOU for your dedication and hard work with us as we proudly salute your wonderful achievement!
- A sensational salute and congratulations to **Ruta Couet**, World Languages Education Associate in the Office of Teacher Effectiveness at the South Carolina Department of Education, for being named the **2011 State Supervisor of the Year by the National Council of State Supervisors for Languages (NCSSFL)**. Ruta has been the world languages specialist for the SC Department of Education since 1994. She has co-authored many publications, was a member of the assessment team for the National Board of Professional Teaching Standards for World Languages Other than English and also served as an advisor to the national Teaching Foreign Languages Project. Over the last 17 years, Ruta has worked with eMedia (formerly ITV) and ETV on many special projects for our state, including the development of **Bringing New Languages to Young Learners**, a distance-learning K–8 methods program and **Kids Interacting Through Early Language Learning (KITE-LL)**, a hybrid distance-learning program for grades 3–5 in French, German and Spanish. Her production of the **Why Teach French** series earned Ruta the Knighthood for Academic Palms from the Republic of France in 2004. And, her SCDE Professional Development series *Teaching and Language Learning Collaborative* that airs monthly and is archived in *StreamlineSC* for access is valued by educators across the state! We appreciate all the outstanding work that Ruta has done with ITV/eMedia and ETV to provide quality resources for SC students and educators. THANK YOU, Ruta!
