

An Introduction to Floating Wetlands for Stormwater Ponds

Posted on 24 January, 2024

Floating wetlands are artificial floating platforms planted with vegetation that can be deployed in stormwater ponds and other surface waters to help improve water quality. Floating wetlands absorb excess nutrients, provide habitat for aquatic and terrestrial wildlife, and may reduce the frequency of algal blooms. This publication contains information that may be useful to municipalities, [...]

Classroom Group Projects Using Industry-Based Communication Tools

Posted on 17 January, 2024

Project-based learning is a common teaching method that allows students to learn by becoming active participants in real-world and meaningful projects.¹ With these projects comes the need for communication and information sharing. The purpose of this publication is to establish an understanding of the effectiveness of different methods of digital communication—a traditional Gantt chart, emails, [...]
