Child Welfare Quality Assurance Review Report
Beaufort County
May 2018

This report describes the results of the South Carolina Department of Social Services (SC DSS) Beaufort County Quality Assurance Review. The period under review was May 1, 2017 to the date the case was reviewed, which was conducted during the weeks of May 7, 2018, and May 14, 2018. The following report provides a description of the items, the results for the outcomes and items, and a brief summary of the county's performance on the items. For more information on the quality assurance process, please visit (www.dss.sc.gov).

SC DSS Child Welfare Quality Assurance Reviews are conducted using the federal Onsite Review Instrument (OSRI). The newly revised OSRI was finalized by the Administration for Children & Families in July 2014 and updated in January 2016. The instrument is used to review foster care and family preservation cases. Twenty cases were reviewed including ten foster care cases, eight in-home services cases, and two community based prevention services cases.

The OSRI is divided into three sections: safety, permanency, and child and family well-being. There are two safety outcomes, two permanency outcomes, and three well-being outcomes. Reviewers collect information on a number of items related to each of the outcomes through case file review, the use of the Child and Adult Protective Services System (CAPSS), and case related interviews. CAPSS is South Carolina's Statewide Automated Child Welfare Information System (SACWIS), which contains all case related information. This information is used to rate each item on the OSRI.

The ratings for each item are combined to determine the rating for the outcome. The items are rated as *strength*, *area needing improvement*, or *not applicable*. Outcomes are rated as being *substantially achieved*, *partially achieved*, *not achieved*, or *not applicable*.

Child Welfare Quality Assurance Review – Outcome Ratings

Results for outcomes and items are reported by the number of cases and the percentage of total cases given each rating. In addition, the percentage of strengths is calculated for each item. This percentage is calculated by adding the number of strengths and the number of areas needing improvement. The number of strengths is divided into this total to determine the percentage of strengths. The percentage of strengths for each item as well as a summary of what the agency did to achieve that rating for those cases is provided in Section I.
