

What We Do

Inspections, Compliance Assistance, Complaint Response, and Monitoring:

- Air Quality
- Beaches & Recreational Water
- Bulk Petroleum Terminals
- Dam Safety
- Environmental Laboratories
- Environmental Response
- Environmental Surveillance & Oversight
- Food Protection
- Mining & Reclamation
- Mosquito-borne Disease Surveillance
- Rabies Prevention
- Septic Systems
- Solid & Hazardous Waste
- Stormwater & Drinking Water
- Surface Water & Wastewater
- Underground Storage Tanks

Bureau of Environmental Health Services

Environmental Laboratories

Environmental Laboratories

Analytical & Radiological Environmental Services

- Microbiological, chemical, and radiological analysis of samples from many of the following sources: drinking water, wastewater, streams, lakes, ocean water, soil, fish, vegetation, chemical waste, shellfish, and milk/dairy
- Provide data to the public, EPA, FDA, and DHEC programs
- Maintain a mobile rad lab for radiological emergencies or special investigation
- The Milk and Dairy laboratory performs microbiological and chemical analyses on milk and dairy products from dairies across the state. Some of the items tested are pasteurized milk, raw milk and ice cream samples for bacterial count, butterfats and phosphatase.

Environmental Laboratory Certification

- Certify environmental laboratories (in-state, out-of-state, commercial, municipal, industrial, state, federal, and mobile laboratories) performing analyses of drinking water, hazardous waste, milk, solid waste, and wastewater that are required by or submitted to the Department
- Perform on-site evaluations and reviews procedures and data for various analyses including organic and inorganic chemistry, trace metals, microbiology, toxicity, and radiologicals
- Determine adherence to federal regulations, methods, and requirements and provides technical support to certified labs and DHEC programs

Air Quality Analysis

- Monitor SC ambient (outdoor) air through a network of 26 monitoring stations across the state for particulate concentrations like dust or haze and gaseous pollutants including ozone and air toxics

Medical Entomology

- Provide surveillance for mosquito-borne diseases in SC and identifies disease clusters in mosquitoes, birds, veterinary animals, and people
- Utilize surveillance data and analyses to guide mosquito control and public education activities to prevent human and animal disease outbreaks
- Perform identification and pooling of mosquitoes
- Provide training and logistical support for statewide mosquito surveillance participants
