### Profile

### South Carolina Retirement Systems

The South Carolina Retirement Systems administers four defined benefit pension plans, which provide lifetime retirement annuities, disability benefits and death benefits to eligible members. The plans' terms specify the amount of pension benefits to be provided at a future date or after a certain period of time. The amount specified is a function of a formula based on years of service, compensation and age. The South Carolina Retirement Systems also administers a defined contribution retirement plan, which is an alternative to membership in the traditional SCRS defined benefit plan. The five retirement plans administered by the Retirement Systems are as follows:

- The South Carolina Retirement System (**SCRS**) was established July 1, 1945, to provide retirement and other benefits for teachers and employees of the State and its political subdivisions.
- The State Optional Retirement Program (**State ORP**) was first established as the Optional Retirement Program for Higher Education in 1987. In it's current form, the State ORP is an alternative to the defined benefit SCRS plan offered to certain state, public school and higher education employees of the State.
- The Police Officers Retirement System (**PORS**) was established July 1, 1962, to provide retirement and other benefits to police officers and firefighters.
- The Retirement System for Members of the General Assembly of the State of South Carolina (**GARS**) was established January 1, 1966, to provide retirement and other benefits to members of the General Assembly.
- The Retirement System for Judges and Solicitors of the State of South Carolina (**JSRS**) was established July 1, 1979, to provide retirement and other benefits to State Judges and Solicitors.

The mission of the South Carolina Retirement Systems is to administer a comprehensive program of retirement benefits responsive to the needs of public employees and to perform fiduciary duties as stewards of the contributions and disbursements of the pension trust funds. Our vision is to empower our employees to provide comprehensive service in a professional manner for our members, employers, and retirees through timely and accurate processing of payments, claims, inquiries, and other account information using effective and appropriate leading edge technology.

## 2003 Popular Annual Financial Report

It is our pleasure to confirm to you that your retirement plan is sound. Our defined benefit pension plans provide lifetime annuities to retirees and beneficiaries based on years of service and a legislatively adopted benefit formula. We judge the health of our system through actuarial valuations. Our actuarial consultants estimate our future liabilities and our future assets based on a variety of assumptions commonly accepted in the actuarial industry. The actuaries then estimate what portion of our future liabilities are not yet funded and how long it will take to fund them at current rates. The greater the level of funding, the larger the ratio of actuarial assets to actuarial accrued liability (funded ratio).

Governmental accounting standards require that the maximum acceptable amortization period for the total unfunded actuarial liability is 30 years. As of the July 1, 2002, actuarial valuation, all four systems are considered adequately funded within GASB standards. The current funded ratios of the four plans range from 60.0 percent to 93.0 percent, and the unfunded liability amortization period ranges from 15 to 30 years. The following chart illustrates funded ratios over the past five years.

In order to ensure the Retirement Systems' ability to properly fund the payments of retirement benefits to members in future years, it is necessary to accumulate funds on a regular and systematic basis. The principal sources from which the Systems receive revenues are employee contributions, employer contributions and earnings on investments. Expenses of the Systems consist primarily of payments of monthly annuities to retired members and their beneficiaries and refunds of member contributions paid upon termination. Other programs administered by the Systems include a group life insurance plan for both active and retired members and an accidental death plan for police officers. Condensed financial statements for the fiscal year ended June 30, 2003 are as follows:

The *Statement of Plan Net Assets* presents the Plan's assets and liabilities and the resulting net assets, which are held in trust for pension benefits. This statement reflects a year-end snap shot of the Plan's investments, at market value, along with cash and short-term investments, receivables, and other assets and liabilities.

We have a diversified investment portfolio that is designed to provide long-term returns. The custodian of our assets, the State Treasurer, and the Investment Panel work diligently to ensure our investment strategy is pragmatic and conservative, while providing competitive returns. For the year ended June 30, 2003, the combined Systems investment portfolio produced a total return, net of expenses, of 8.9 percent, compared to a combined return of .92 percent for fiscal year 2002. Our investment return exceeded our assumed actuarial investment return of 7.25 percent, which will have a positive effect on the next actuarial valuation of the Systems.

## 2003 Popular Annual Financial Report

Below is a summary of our financial highlights for fiscal year 2003:

- In both fiscal year 2002 and fiscal year 2003, the South Carolina Retirement Systems was recognized by *Pensions & Investments*, The International Newspaper of Money Management, for having the highest one-year investment return of surveyed public pension funds.
- Plan net assets of the four pension trust funds administered by the South Carolina Retirement Systems increased by \$1.42 billion during fiscal year 2003, compared to a decrease of \$111.1 million in fiscal year 2002. This increase was due primarily to the strong performance of our fixed income investments, which contributed to our combined investment return of 8.9 percent for the four pension plans.
- State legislation effective July 1, 2002, expanded eligibility for participation in the State Optional Retirement Program (State ORP), which is administered by the South Carolina Retirement Systems. State ORP is a defined contribution plan that serves as an alternative to membership in the traditional South Carolina Retirement System (SCRS), which is a defined benefit plan. Expanded State ORP eligibility includes employees hired into full-time permanent positions with state agencies, institutions of higher education, and public school districts. As a result of this legislation, participation in State ORP increased during fiscal year 2003 when compared with the previous fiscal year.
- The deferred retirement option program, known as the Teacher and Employee Retention Incentive (TERI) program, which was initiated January 1, 2001, continued to experience great popularity among our membership during fiscal year 2003. The TERI program allows a member to accumulate a tax-deferred monthly retirement benefit while continuing to earn a salary from full-time employment. The Retirement Systems holds the accumulated TERI retirement benefits in trust for the member, thus creating a liability for the Retirement Systems. The amount of assets held in trust for future payment increased by 85.07 percent during the fiscal year. This increase is a result of both a growth of approximately 2,700 new participants in the program during the fiscal year and the continued accumulation of benefits deferred on a monthly basis for all participants. During fiscal year 2003, a legislative bill was proposed in the SC General Assembly to repeal the TERI program. Although no action was taken on the bill, its introduction contributed to the large number of new participants taking advantage of TERI.
- The number of active members in the South Carolina Retirement Systems decreased in fiscal year 2003 when compared with fiscal year 2002. The change resulted from increased State ORP participation, increased number of retirees returning to work (due in part to TERI participation), and as a result of continued state

budget cuts enacted during the fiscal year, which resulted in reductions in the number of active employees and teachers.

- The amount of retirement benefits paid as annuities to retired members and beneficiaries (not including TERI expenses) increased 7.34 percent during the current fiscal year. The increase is due to the continued effects of 28-year retirement, an increase in the number of members electing to retire as a result of retirement incentives and state budget issues, and a 1.3 percent cost of living adjustment granted to eligible annuitants effective July 1, 2002.

The South Carolina Retirement Systems received the 2003 Leadership Recognition Award in the Communications category from the National Association of Government Defined Contribution Administrators (NAGDCA) in August. The Retirement Systems' State Optional Retirement Program and Investment Education project garnered the award.
