DATA INTERPRETATION

This report contains tables of counts of deaths classified according to the cause of death and the age, race and sex of the decedent for South Carolina residents.

This report supplements the annual publication, South Carolina Vital and Morbidity Statistics, Volume I. The Detailed Mortality Statistics report presents deaths allocated to the place of residence for the deceased, regardless of where the death occurred. The counts of deaths for each cause are shown for race, sex and age categories. The race categories are white, and black, and other; black and other are predominately Black (97 percent) in South Carolina.

Four age categories are shown for infants – less than 1 day, less than 1 week, less than 28 days and less than one year of age. These age categories are cumulative such that a death occurring during the first day of life is counted again in the three subsequent age categories. For deaths occurring at one year of age or older, counts are grouped into 5 or 10-year age intervals (age in complete years).

The cause of death is the underlying cause classified according to the tenth revision of the International Classification of Diseases (ICD). Counts of deaths are displayed for the detailed list of causes. Only sixty characters of the name of each cause category are printed. If there were no deaths in a particular category, the name is not printed. Complete descriptions of the cause categories are provided in the ICD.

In the tables of this report, the causes of death categories are ordered from the general to the specific. The 4-digit alphanumeric category is the most specific classification. A 3-digit category is the sum of 4-digit alphanumeric categories having the same first three digits. There are 2600 possible 3-digit alphanumeric categories. A group of categories is the sum of 3 digit alphanumeric categories with similar attributes. There are 91 groups in this report. Note that the order is the same as 1999-2001.

<u>LEVEL</u>	<u>ICD CODE</u>	<u>CATEGORY</u>
Section	100-199	Diseases of the Circulatory System
Group	126-128	Pulmonary Heart Disease & Diseases of Pulmonary Circulation
3-Digits	126	Pulmonary Embolism
4-Digits	126.0	Pulmonary Embolism with mention of Acute Cor Pulmonale

There have been several revisions of the International Classification of Diseases. Therefore, in comparing causes in this report to causes of death prior to 1999, the user should be aware of comparability ratios published by the National Center for Health Statistics, May 19, 2001, in the national Mortality Vital Statistics Report, vol. 49, no. 2.
