Tax Credit Spotlight

This month's spotlight features a masonry textile mill office building in Dunean, a suburb of Greenville, with a period of significance dating from its construction around 1911 to 1955. With a private investment of nearly \$3 million the mill office was rehabilitated into multi-family apartments. The scope of work included masonry cleaning, restoration of the modillion cornice and a missing porch; rehabilitation of historic windows; preservation of interior finishes and features such as bead board, wainscoting, wood paneling, staircases, and corridors; restoration of an interior light court; and upgrades to the MEP systems. One of the project partners, Matt Prielozny, stated, "The rehabilitation of the Dunean Mill office was made possible by state and federal historic tax credits. The building had sat vacant for over 30 years, slowly succumbing to the elements... The credits allowed us to offset a large portion of the expenses necessary to reimagine the building as a vibrant multi-family residential space that is an asset to the community once again. Mr. Pace Burt relied heavily on the unwavering support of Dan Elswick and others on his team to guide him through the process. The South Carolina State Historic Preservation Office was a tremendous help and they worked hard to streamline the process to better support those who relied on these tax credits to make the project financials work. Mr. Burt has since worked on this project type in many states and believes South Carolina remains leaps and bounds ahead of other states with their offerings to make the most of these historic resources."
