# Clinical Information for Final Discharge Episodes in State Fiscal Year 2021

Patient Demographics  
Substance Use Profiles  
Treatment Utilization  
State and County Level Outcomes  
Employment  
Living Situation  
Arrest  
Alcohol and Other Substance Use

Run Date = December 1, 2021

SOURCE: This report was produced from Clinical Data Extracts Provided by the S.C. County System's Electronic Clinical Record

*S.C. Department of Alcohol & Other Drug Abuse Services*

## **REPORT NOTES**

The Discharged Episodes Report is intended to assist our county providers in monitoring and reporting patient substance abuse treatment outcomes in South Carolina. The present report covers a total of **26,109** patient episode discharges during the period of **FY2021** (July 1, 2020 – June 30, 2021).

To build the dataset, we utilize the following Carelogic data tables:

Rpt\_TED\_NOM\_Combined  
Rpt\_Client  
Rpt\_Programs  
Rpt\_Client\_Episodes

The report is basically organized into three sections:

Patient Demographics and Substance Abuse Profiles (Pages 1-6)  
Treatment Utilization (Pages 7-9)  
Patient Outcomes (Pages 10-12)

### **Definitions**

**Final Episode Discharge:** The final episode discharge record is obtained by selecting records in the TED\_NOM\_Combined table where the data field TYPE\_TRAN\_DIS\_REQUEST = “Discharge from Episode/Organization”.

**Run Date:** This is the date we extracted the dataset for analysis and reporting.

**Length of Stay (LOS)** includes time spent in all programs accessed during an episode of care (initial admission to final discharge).

**Dominant Program:** Dominant program status is determined by assigning discharges to highest level of care accessed during an episode of care.

**Outcomes:** These data elements are required by SAMHSA for their National Outcome Measures (NOMS). Note that each outcome domain contains its own criteria (i.e. Employment Status is limited to clients age 18 and older). We measure outcomes at 3 points: Admission – Discharge – Follow-up Survey so only records where the patient provided a response to the question are included.

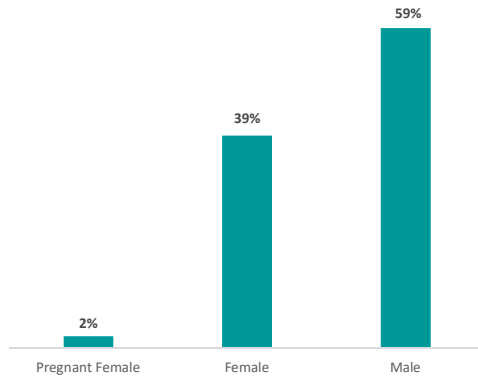

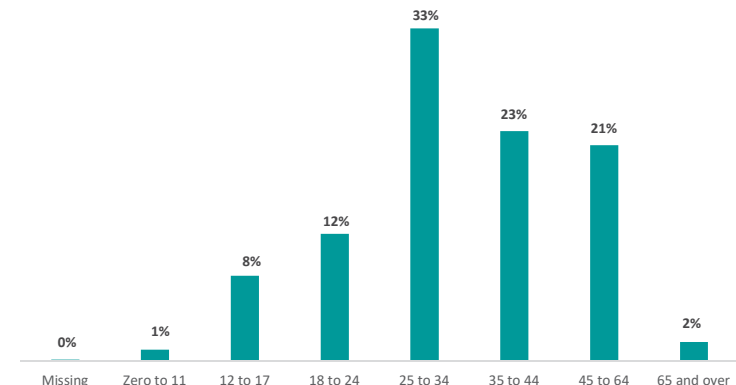

### **Feedback**

The work of creating and refining statistical reports based on the Carelogic System is an on-going process so we welcome your suggestions and feedback on how we can provide you with the most useful information.

\* Dominant program status determined by assigning discharges to highest level of care accessed during an episode of care

\*\* Length of stay includes time spent in all programs accessed during an episode of care (initial admission to final discharge)

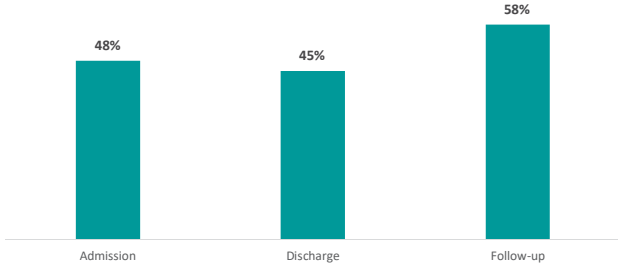

**Note also that Detox and Other Services are not included above so program totals will not equal total discharges.**
