

FACTS ABOUT FOSTER KIDS

Horry County

2005

(2004 Data)

A Publication of the South Carolina Governor's Office – Division of Foster Care Review

OVERVIEW

Facts About Foster Kids is intended to provide annual data about children in foster care for every county in South Carolina. It covers: **Demographics** -- how many children there are in foster care, their characteristics and whether their prevalence is increasing or decreasing; **Areas of Concern** -- legal and program shortcomings identified at monthly citizen reviews; and **Progress Measures** -- length of time in care, number of placements, achieving permanency, and recidivism rates. Information is collected from local volunteer citizen review boards that review the cases of all children who have been in foster care at least four months; each case is then reviewed every six months thereafter until the child leaves care. The 2005 edition includes complete information about children who were reviewed at least once in 2004. It also includes demographics on those children who entered foster care late in the year and were not reviewed until 2005, but does not yet incorporate them into progress measures or areas of concern.

DEMOGRAPHICS

For Horry County, the number of foster care children reviewed increased slightly in 2004. In 2004, the number of children entering care and the number leaving care decreased slightly.

Children in Foster Care, 2002 – 2004, Horry County				
	2004	2003	2002	Average
Number of Children Reviewed	249	246	268	254
Change from Prior Year	+3	-22		
Number Entering	50	54	64	56
Number Leaving	83	85	81	83

No Timely FCRB Hearing	7	6	3
No Advance Packet	39	17	25
Other Policy/Procedure Issues	42	48	57
TOTAL	544	504	386
Percent of Reviews with Areas of Concern	73%	76%	54%

PROGRESS MEASURES

Four main indicators are used to measure progress towards better outcomes for children in foster care. For each, comparison data for the previous three years are provided.

LENGTH OF TIME IN CARE:

The longer a child is away from their home or a nurturing family environment, the more damaging it can be to the normal development of the child. For this reason, a major goal of the Review Board is to ensure that children achieve permanency as quickly as possible. In 2004, the average length of time a child spent in care was 2.6 years.

NUMBER OF PLACEMENTS:

Research shows the initial placement in foster care is extremely traumatic for a child. Additional changes in placement once in the foster care system can be detrimental to children's development, affecting their ability to learn, establish relationships and develop as stable, secure individuals. In 2004, children in foster care averaged three placements.

PERCENT ACHIEVING PERMANENCY:

Permanency for a child means placement with a "forever family." A child can achieve legal permanency upon leaving the foster care system either by returning home to their natural parent or by being adopted. In 2004 of the 83 children leaving care, seven were adopted and 44 returned home to their natural parent.

RECIDIVISM RATES:

Children who re-enter care are some of the most vulnerable children in foster care because they have been in the custody of DSS more than once. In 2004, 16% of the children entering foster care in Horry County had previously been in custody. For children re-entering foster care, the previous location matters. Last year, all of the children re-entering care were in the custody of their parents or another relative.
