

South Carolina Department of Transportation

Source Qualification Process
For Qualified Products Listing 67

Alternative Second Method Substructure Waterproofing

Only materials from sources appearing on the Department's Qualified Products Listing, titled "Second Method Waterproofing," as of the project's bid date shall be used for that project. A manufacturer may request approval by furnishing the following information to the Pavement Systems Manager:

1. A certification from the manufacturer that each shipment of material meets the Department's specification titled "Second Method Waterproofing." The certification shall include actual material test results from a recognized laboratory. A copy of the latest version of the specification, which includes material requirements, may be obtained from the SCDOT Contact listed below.
